On February 3, 2021, Commerce published the countervailing duty order on PC strand from Turkey. On April 12, 2022, Commerce published the notice of

initiation of this administrative review.2 For a complete description of the events that followed the initiation of this review, see the Preliminary Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is provided as the appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at https:// access.trade.gov. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at https://access.trade.gov/public/ FRNoticesListLayout.aspx.

Scope of the Order

The product covered by the *Order* is PC strand from Turkey. For a complete description of the scope of the *Order*, see the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this administrative review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). In reaching these preliminary results, Commerce relied on facts otherwise available, with the application of adverse inferences.4 For further information, see "Use of Facts Otherwise Available and Application of Adverse Inferences" in the accompanying Preliminary Decision Memorandum. For a full description of the methodology underlying our conclusions, see the Preliminary Decision Memorandum.

Preliminary Results of Review

Commerce preliminarily determines the following net countervailable subsidy rates for the POR:

Company	Subsidy rate (percent ad valorem)
Celik Halat ve Tel Sanayi	96.33

Commerce has not calculated an estimated weighted-average subsidy rate for all other non-selected producer(s)/exporter(s) because Celik Halat was the only company subject to this administrative review.

Stainless Steel Sheet and Strip From the People's Republic of China: **Continuation of Antidumping and Countervailing Duty Orders**

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) have determined that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on stainless steel sheet and strip (SSSS) from the People's Republic of China (China) would be likely to lead to the continuation or recurrence of dumping, net countervailable subsidies, and material injury to an industry in the United States. Therefore, Commerce is publishing a notice of continuation of these AD and CVD orders.

DATES: Applicable November 4, 2022. FOR FURTHER INFORMATION CONTACT: Daniel Alexander, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue

NW, Washington, DC 20230; telephone:

(202) 482–4313.

SUPPLEMENTARY INFORMATION:

Background

On April 3, 2017, Commerce published the AD and CVD orders on SSSS from China.¹ On March 1, 2022, Commerce published the notice of initiation of the first sunset reviews of the Orders, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).2 As a result of its reviews, Commerce determined that revocation of the AD order would likely lead to the continuation or recurrence of dumping and that revocation of the CVD order would likely lead to the continuation or recurrence of countervailable

subsidies.³ Therefore, Commerce notified the ITC of the magnitude of the dumping margins and net countervailable subsidy rates likely to prevail should the Orders be revoked, pursuant to sections 752(b) and (c) of the Act. On October 24, 2022, the ITC published its determination, pursuant to section 751(c) of the Act, that revocation of the Orders would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable

Scope of the Orders

The merchandise covered by these Orders is stainless steel sheet and strip, whether in coils or straight lengths. Stainless steel is an alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. The subject sheet and strip is a flat-rolled product with a width that is greater than 9.5 mm and with a thickness of 0.3048 mm and greater but less than 4.75 mm, and that is annealed or otherwise heat treated, and pickled or otherwise descaled. The subject sheet and strip may also be further processed (e.g., cold-rolled, annealed, tempered, polished, aluminized, coated, painted, varnished, trimmed, cut, punched, or slit, etc.) provided that it maintains the specific dimensions of sheet and strip set forth above following such processing. The products described include products regardless of shape, and include products of either rectangular or non-rectangular crosssection where such cross-section is achieved subsequent to the rolling process, i.e., products which have been "worked after rolling" (e.g., products which have been beveled or rounded at

For purposes of the width and thickness requirements referenced above: (1) where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above; and (2) where the width and thickness vary for a specific product (e.g., the thickness of
