Panel review was requested of the antidumping duty determination made by the Secretaria de Economia, respecting Pipe Line Longitudinally Welded with external or internal circle closed section, classified as tariff item 7305.11.01 and 7305.12.01 originating in the United States of America. FOR FURTHER INFORMATION CONTACT: Caratina L. Alston, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482-5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the Mexican Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on June 24,

2005, requesting panel review of the final determination described above.

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is July 25, 2005);

(b) A Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is August 8, 2005); and

(c) The panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: July 6, 2005.

The applicant proposes to capture up to 106 green sea turtles over the course of a three-year permit, utilizing dip nets or pound nets. The pound nets will be set up daily by the researchers, monitored at all times, and taken down when not in use. All 106 turtles will be captured, measured, Passive Integrated Transponder (PIT) and flipper tagged, blood sampled, skin biopsied, oral gastric lavaged, fecal sampled, and released. A subset of these turtles would have satellite or acoustic transmitters attached to their carapace. The purpose of the proposed research is to study juvenile and sub-adult green sea turtles found in the waters of the Big Sable Creek (BSC) complex in Everglades National Park in southwest Florida, to determine whether or not these animals are resident in BSC, or use it as a stopover point during migration; to determine whether the turtles use BSC as a foraging or nursery grounds; to determine the turtles' origin by use of genetic testing; to determine what the turtles forage on while in BSC; to determine their relative abundance over time; to detect changes in sea turtle size and age composition; and to track the turtles using a variety of tagging methods to monitor and document movement and migration patterns.
