POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service.

ACTION: Notice of modified systems of records.

SUMMARY: The United States Postal Service® (USPS) is proposing to revise one General Privacy Act System of Records (SOR). These modifications are being proposed to support an initiative to streamline the employee lead generation entry process for leads submitted by USPS employees on behalf of business customers that request to speak with a USPS Sales Representative about Postal products and services. Employee leads generate potential opportunities for new revenue for the Postal Service. Streamlining and simplifying the entry process for the employee lead generation program will enhance the employee's ability to meet customer needs, improve responsiveness and encourage additional employees to participate in the LEADing Together program, or similar programs.

DATES: These revisions will become effective without further notice on November 3, 2022, unless in response to comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (privacy@usps.gov). To facilitate public inspection, arrangements to view copies of any written comments received will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202–268–3069 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision, change, or addition, or when the agency establishes a new system of records. The Postal Service has determined that General Privacy Act Systems of Records, USPS SOR 100.500, Personnel Resource Management Records, should be revised to support the streamlined entry process for employee lead generation programs.

I. Background

The Postal Service is implementing a streamlined process for employees that enter information about a Postal business customer lead for subsequent follow-up with a USPS Sales employee. The objective of this initiative is to improve ease of use for participating employees by pre-filling their work position and location information from a central database, rather than having to manually look-up needed information from multiple sources to complete the entry process. This new approach will assure that credit is assigned to the employee that acquires the lead submission from a business customer. Employee lead programs have been around since 2003 and have been an effective way of generating new revenue for the Postal Service. Enhancements are being made to support the LEADing Together initiative and are based on improvements in functionality that provide employees with a streamlined process for submitting customer leads. The streamlined process also reduces the complexity and time associated with the current manual lead entry process.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The Postal Service continuously seeks to improve internal processes and procedures that will reduce workhours and increase productivity.

Modifications are being proposed to USPS SOR 100.500, Personnel Resource Management Records to streamline and simplify the employee lead generation entry process by pre-filling work position and location information, resulting in improved ease of use. A summary of proposed modifications is listed below.

- A new Purpose is being added as purpose #4
- A new Category of Record is being added as categories of records #3, Employee lead generation program(s)
- The System Manager's title has been updated to reflect current USPS organizational structure

III. Description of the Modified System of Records

Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed revisions has been sent to Congress and to the Office of Management and Budget for their evaluations. The Postal Service does not expect this amended system of records to have any adverse effect on individual privacy rights.
