BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2022-0119]

Personnel Access Authorization Requirements for Non-Immigrant Foreign Nationals Working at Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory issue summary; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on a draft regulatory issue summary (RIS) that reminds licensees of the NRC requirement that prior to granting or reinstating unescorted access (UA) or certifying unescorted access authorization (UAA) to non-immigrant foreign nationals for the purpose of performing work, licensees shall validate that the foreign national's claimed non-immigration status is correct. This is important to ensure that individuals to whom a licensee intends to grant UA to nuclear power plant protected or vital areas or any individual for whom a licensee or applicant intends to certify UAA, are trustworthy and reliable such that they do not constitute an unreasonable risk to public health and safety or the common defense and security, including the potential to commit radiological sabotage.

DATES: Submit comments by August 12, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2022–0119 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

The NRC, in collaboration with the Department of Homeland Security, has identified several instances where a licensee has failed to appropriately verify that the claimed non-immigration status of foreign nationals seeking UA and/or UAA is correct. Consequently, foreign nationals have been granted UA and UAA at United States nuclear power plants for the purpose of work using visa categories that do not permit foreign nationals to work in the United States.

The NRC issues RISs to communicate with stakeholders on a broad range of matters. This may include communication and clarification of NRC technical or policy positions on regulatory matters that have not been communicated to or are not broadly understood by the nuclear industry.

As noted in 83 FR 20858 (May 8, 2018), this document is being published in the Proposed Rules section of the **Federal Register** to comply with publication requirements under 1 CFR chapter I.

III. Proposed Action

The NRC is requesting public comments on the draft RIS. All comments that are to receive consideration in the final RIS must be submitted electronically or in writing as indicated in the **ADDRESSES** section of

this document. The NRC staff will make a final determination regarding issuance of the RIS after it considers any public comments received in response to this request.

Dated: June 7, 2022.

Chief, Generic Communications and Operating Experience Branch, Division of Reactor Oversight, Office of Nuclear Reactor Regulation.
