SUPPLEMENTARY INFORMATION:

Background

On September 29, 2022, we published a Notice of Receipt (NOR) regarding an adequate and complete application received by Atlantic Shores, who has requested NMFS to authorize the taking of marine mammals incidental to the construction of two offshore wind energy projects located off of New Jersey in and around lease area OCS–A–0499 (87 FR 59061). The NOR allowed for a 30-day public comment period, which is scheduled to close on October 31, 2022. On October 3, 2022, we received a request from the Save Long Beach Island, Inc. Coalition for Wind Without Impact (Save LBI) for a 15-day extension of the public comment period. The request indicated that Save LBI needed more time to conduct their review of the available documents and provide comments. Given that the targeted publication date of the proposed rule is May 1, 2023 (per Title 41 of the Fixing America's Surface Transportation Act (FAST–41); <https://www.permits.performance.gov/permitting-project/atlantic-shores->

south) and the requested extension would not interfere with any of the intermediate milestones, NMFS has elected to provide additional time (15 additional days) for public comment.

NMFS is extending the public comment period from an original end date of October 31, 2022, (87 FR 59061) to November 15, 2022, per this notice. No information has changed and all information that was previously described in the Background section, the Summary of Request section, and the Specified Activities section of the prior notice (87 FR 59061, September 29, 2022) remain applicable to this notice and the activities proposed by Atlantic Shores. Furthermore, all information remains available to the public on NMFS' website (<https://www.fisheries.noaa.gov/action/incidental-take-authorization-atlantic-shores-offshore-wind-llc-construction-atlantic-shores>). All comments and information submitted previously regarding Atlantic Shores' projects will be fully considered in preparation of the proposed rule and do not need to be resubmitted.

Dated: October 25, 2022.

Director, Office of Protected Resources, National Marine Fisheries Service.

The total annual cost of time to inspect all facilities is estimated to be \$9,603 (\$64.02 × 150).

General Description of Collection

The Virginia Graeme Baker Pool and Spa Safety Act (Act), 15 U.S.C. 8001–8008, applies to public swimming pools and spas, and it requires that each swimming pool and spa drain cover manufactured, distributed, or entered into commerce in the United States shall conform to the entrapment protection standards of the ASME/ANSI A112.19.8 performance standard or any successor standard regulating such swimming pool or drain cover under section 1404(b) of the Act.

On August 5, 2011, the CPSC published a final rule incorporating by reference ANSI/APSP-16 2011 as the successor standard, effective September 6, 2011. 76 FR 47436. On May 24, 2019, the CPSC published a direct final rule incorporating by reference ANSI/APSP-16 2017 as the next successor standard. 84 FR 24021. The Act requires that, in addition to having the anti-entrapment devices or systems, each public pool and spa in the United States with a single main drain other than an unblockable drain shall be equipped with one or more of the following devices or systems designed to prevent entrapment by pool or spa drains: a safety vacuum release system, suction-limiting vent system, gravity drainage system, automatic pump shut-off system or drain disablement. The CPSC will collect information through the verification of compliance form to identify drain covers, pools, and spas that do not meet the performance requirements in ANSI/APSP-16 2017 and the Act. CPSC staff or the designated State or local government official will take approximately 3 hours to inspect the pool and fill out the checklist on the verification of
