SUPPLEMENTARY INFORMATION:

Purpose and Need for the Proposed Action

The BLM's purpose and need for Federal action is to respond to SunZia's application to amend its right-of-way grant (NM 114438) under Title V of the Federal Land Policy and Management Act (FLPMA) consistent with applicable laws. In compliance with the National Environmental Policy Act, and FLPMA, the BLM New Mexico State Office has prepared a Draft EIS to analyze the environmental impacts associated with SunZia's amendment application. Proposed amendments to SunZia's right-of-way grant will require a plan amendment to the Socorro Field Office RMP, which the BLM has analyzed in the Draft EIS. The purpose and need of the U.S. Fish & Wildlife Service Federal action is to respond to requests to co-locate the SunZia transmission line with existing transmission line easements across the Sevilleta National Wildlife Refuge. The purpose of the U.S. Forest Service Federal action is to respond to the Applicant's application for a right-of-way to construct, operate, maintain, and decommission a transmission line on Federal lands.

Proposed Action and Alternatives

The SunZia Project is composed of two planned 500 kilovolt transmission lines located across approximately 520 miles of Federal, State, and private lands between central New Mexico and central Arizona. The purpose of the Project is to transport up to 4,500 megawatts of primarily renewable energy from New Mexico to markets in Arizona and California. The permitted route originates at a planned substation in Torrance County, New Mexico, and

terminates at the existing Pinal Central Substation in Pinal County, Arizona. The Project traverses Lincoln, Socorro, Sierra, Luna, Grant, Hidalgo, Valencia, and Torrance counties in New Mexico and Graham, Greenlee, Cochise, Pinal, and Pima counties in Arizona. The route has four segments:

- *Segment 1:* Pinal Central Substation to Willow Substation;
- *Segment 2:* Willow Substation to SunZia South Substation (Segment 2a in Arizona, Segment 2b in New Mexico);
- *Segment 3:* SunZia South Substation to New Mexico Institute of Mining and Technology (New Mexico Tech); and
- *Segment 4:* New Mexico Tech to SunZia East Substation.

Prior environmental documents include a Final EIS in 2013, a subsequent Environmental Assessment and Finding of No New Significant Impact in 2015 to accommodate burial of approximately five miles of the transmission line in three locations within the White Sands Missile Range Northern Call-Up Area, and then a Record of Decision in 2015. The BLM issued a right-of-way grant to SunZia in 2016, authorizing use of a 400-foot-wide right-of-way across 183 miles of Federal lands administered by the BLM. Construction of the lines has not begun. SunZia is proposing to amend the existing grant in four components:

- *Component 1—Localized Route Modifications:* Six localized route modifications in New Mexico in Segments 1, 2, and 3. Five modifications involve BLM-administered land (an increase in route length of approximately 0.8 miles and 38.8 acres). The proposed route modification on non-BLM-administered land would involve an increase in route length of approximately 4.7 miles and 45.4 acres. These route modifications are being proposed to address a range of issues, including challenges in obtaining a private landowner right-of-way or easement and topography.
- *Component 2—Access Roads and Temporary Work Areas Outside the Granted Right-of-Way:* Adding a right-of-way for about 844.5 miles of existing and new access roads, of which approximately 804.9 miles would be permanent, 39.6 miles would be temporary, and approximately 1,402.3 acres of temporary work areas that fall outside the permitted 400-foot-wide right-of-way across both States. About 230.0 miles of access roads are on BLM-administered land (179.3 miles in New Mexico; 50.7 miles in Arizona). About 298.4 acres of temporary work areas are located on BLM-administered land in New Mexico and 33.4 acres in Arizona.
