www.faa.gov/space/additional_information/comstac/.

FOR FURTHER INFORMATION CONTACT: James Hatt, Designated Federal Officer, U.S. Department of Transportation, at james.a.hatt@faa.gov. Any committee related request should be sent to the person listed in this section.

SUPPLEMENTAL INFORMATION:

I. Background

The Commercial Space Transportation Advisory Committee was created under the Federal Advisory Committee Act (FACA), in accordance with Public Law 92-463. Since its inception, COMSTAC has provided information, advice, and recommendations to the U.S. Department of Transportation through FAA regarding technology, business, and policy issues relevant to oversight of the U.S. commercial space transportation sector.

II. Agenda

At the June 22, 2020 meeting, the agenda will cover the following topics: Secretary of Transportation Elaine Chao

Welcome Remarks

FAA Administrator Steve Dickson

Welcome Remarks

FAA Associate Administrator for Commercial Space Transportation, Gen. Wayne Monteith Welcome Remarks

Committee Member Introductions

FAA/AST Updates

AST's Priorities for 2020-2021

Public Comments/Other Business

III. Public Participation

The June 22, 2020 meeting is open to the public. The meeting can be viewed by the public using the internet website

link posted above. The U.S. Department of Transportation is committed to providing equal access to this meeting for all participants. If you need alternative formats or services because of a disability, such as sign language, interpretation, or other ancillary aids, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section by June 15, 2020.

There will be approximately thirty minutes allotted for oral comments from members of the public joining a COMSTAC meeting. To accommodate as many speakers as possible, the time for each commenter may be limited. Individuals wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name, address, and organizational affiliation of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the FAA Office of Commercial Space Transportation may conduct a lottery to determine the speakers. Speakers are requested to submit a written copy of their prepared remarks for inclusion in the meeting records and for circulation to COMSTAC members. All prepared remarks submitted on time will be accepted and considered as part of the record. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, this 21 day of May 2020.

James A. Hatt,

Designated Federal Officer, Commercial Space Transportation Advisory Committee, Federal Aviation Administration, Department of Transportation.

Acting Manager, Transport Standards Branch.

Petition for Exemption

Docket No.: FAA–2020–0492.

Petitioner: Airlines for America.

Sections of 14 CFR Affected:

§§ 91.9(a) and (b), 121.153(a), 121.337(b)(9)(iii).

Description of Relief Sought: Airlines for America petitions for relief from 14 CFR 91.9(a) and (b), 121.153(a), and 121.337(b)(9)(iii) to allow its member airlines to transport cargo, subject to the FAA's conditions, on the floor of the main deck of transport category airplanes without revenue passengers onboard. COVID–19 has dramatically reduced the demand for commercial air travel. Due to this extreme reduction in demand, passenger carriers now have the capacity to carry cargo, including critical medical cargo, in-cabin. The relief that would be provided by this exemption would also support the need to replace the cargo capacity provided on airplanes normally flown by passenger carriers.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2020–0033]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on April 17, 2020, BNSF Railway

Company (BNSF) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 215, Railroad Freight Car Safety Standards, and part 232, Brake System Safety Standards For Freight And Other Non-Passenger Trains And Equipment; End-Of-Train Devices. FRA assigned the petition Docket Number FRA–2020–0033.

Specifically, BNSF requests relief from 49 CFR 215.13, *Pre-departure inspection*, which requires an inspection when combining two separate consists including one or more cars and one or more locomotives that have been properly inspected and tested in compliance with all applicable regulations, meaning that both consists have had a Class I brake test (§ 232.205), Class IA brake test (§ 232.207), or have been designated as extended haul trains and are compliant with all requirements of § 232.213. BNSF states that the requested relief will allow combining two existing and operating trains without additional inspections, besides a Class III brake test. It further states that the relief will allow subsequent separation of two trains without additional inspections, besides a Class III brake test, provided that a record of the original consist remains intact.

In support of its petition, BNSF states that trains to be combined will include both trains operating with head-end locomotives and trains operating with locomotives equipped with LOCOTROL or Radio Controlled Distributed Power Technology (DP), which was developed by GE Transportation Systems. DP technology allows locomotives to be placed strategically in a train and controlled remotely by a leading locomotive at the head of the train. Once trains are combined, BNSF will operate the combined train as a DP train (if it is longer than 10,000 feet) until the train is separated or reaches its destination. The combined train will be allowed one pick-up and/or set-out with the inclusion of the separating event, and the air slips for both trains that were combined will be maintained from the point of combining through the duration of the trip.

BNSF explains that an additional inspection when combining trains is redundant because each train to be combined has had a brake test and inspection and a § 215.13 pre-departure inspection. Further, BNSF states that the combined train will continue to receive designated inspection(s) as required or pre-designated prior to the combining event and that no cars will exceed the
