

in the Plan. The TMDL Technical Assessment Report is included as an appendix to the Plan.

The Services formally initiated an environmental review of the project through a Notice of Intent to prepare a Statement in the Federal Register on February 9, 1999 (64 FR 6325). This notice also announced a 30-day public scoping period, during which other agencies, tribes, and the public were invited to provide comments and suggestions regarding issues and alternatives to be included in the Statement. A draft Statement was subsequently produced and made available for a 62-day public review period on October 22, 1999 (64 FR 57630). Comments received on the draft Statement and responses to those comments are included in the final Statement.

The final Statement fully analyzes a No Action alternative, the Proposed Action, a Forests and Fish Report Alternative, and a Modified Northwest Forest Plan Alternative. Under the No Action Alternative, incidental take permits would not be issued and Simpson would continue a forest management program which avoids take of federally listed species. Under the Forests and Fish Report Alternative incidental take permits would not be issued and Simpson would conduct forest management according to the proposed revisions to the Washington State Forest Practices Act, and avoid take of federally listed species. Under the Proposed Action, the Services would issue Incidental Take Permits and Simpson would implement their proposed Plan on 261,575 acres of Simpson's Washington timberlands. Under a Modified Northwest Forest Plan Alternative, the Services would issue Incidental Take Permits, and Simpson would implement a Plan with riparian conservation measures providing protective buffers approximately mid-way between the buffers provided by the Northwest Forest Plan and the Proposed Action. Current Washington Forest Practices would be applied where Northwest Forest Plan guidelines are not available.

SUPPLEMENTARY INFORMATION: On April 13, 2000, notice was published in the **Federal Register** (62 FR 19877) that a request for a scientific research permit to take humpback (*Megaptera novaeangliae*), finback (*Balaenoptera physalus*) and minke (*B. acutorostrata*) whales had been submitted by the above-named organization. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: July 14, 2000.
