Background and Purpose

NVIC 11-93, which was last revised in November 2003, provides guidance on tonnages used for documentation purposes and the applicability of a vessel's tonnage assignment under domestic regulatory and international tonnage measurement systems to both domestic regulations and international standards. It also clarifies the applicability of U.S. tonnage measurement systems to U.S. flag vessels based on vessel type, length, service, and vessel keel laid date or date of last substantial alteration. Definitions of frequently used terms, including convention length and deck cargo are provided to ensure consistency for users of NVIC 11-93.

Since its latest revision, multiple regulations and standards with tonnage thresholds, such as Non-Tank Vessel

Response Plans, Long Range Identification Tracking System, and the International Convention for the Prevention of Pollution from Ships (MARPOL) Annex VI, have come into force. To reflect these developments and incorporate updates of an administrative nature, the Coast Guard is considering the following changes:

(1) Adding new enclosures discussing the implications of tonnage changes that result from vessel alterations, changes in vessel service, or the addition of temporary deck equipment. This would include discussion of loss of tonnage grandfathering provisions under Article 3(2)(d) of the 1969 International Tonnage Convention and associated interim schemes for the Safety of Life At Sea (SOLAS) and Prevention of Pollution from Ships (MARPOL) international conventions.

(2) Amending Section 2 of Enclosure 1. The Coast Guard would clarify the definition of the terms, "overall length" and "remeasurement," to provide more detail on their applicability. We would also add the terms, "registered length" and "alternate tonnage."

(3) Providing additional examples of tonnage application. The Coast Guard will provide examples of tonnage application that are reflective of newly implemented domestic regulations and international standards.

(4) Amending Tables 5, 6, and 7 of Enclosure 1. The Coast Guard will revise language in Tables 5, 6, and 7 to more comprehensively address international tonnage grandfathering provisions, and reflect the correct date that MARPOL came into force.

(5) Incorporating administrative changes such as updating contact information and making editorial corrections.

Request for Comments

The Coast Guard requests your general comments on the revision under consideration. We also seek comments on any or all of the specific proposed revisions for NVIC 11-93 CH-3. We encourage suggestions for specific examples of tonnage grandfathering, remeasurement, or the use of interim schemes. Written comments and responses will be added to the docket number for this notice (USCG-2010-0025). The Coast Guard intends to review and analyze all comments received in order to develop the next revision to NVIC 11-93.

Authority: This notice is issued under authority of 5 U.S.C. 552 and 46 U.S.C. 14301.
