

Operational Risk Schedule

Proposed changes to the Operational Risk Schedule would provide greater insight into the types and frequency of operational risk expenses incurred by respondents, which would improve ongoing supervisory activities.

The FDIC proposes adding a data item for firms to voluntarily disclose how much of their mortgage related litigation reserve is attributable to contractual representation and warranty claims.

Counterparty Credit Risk Schedule

Significant additions would be made to the Counterparty Credit Risk Schedule in order to more adequately and accurately capture exposure information related to derivatives and securities financing transactions ("SFTs"). These additions would remediate deficiencies discovered in the current collection related to exposure, including a lack of information regarding collateral, asset types, and total exposure to a given counterparty, and have been carefully evaluated internally and vetted with respondents.

The FDIC proposes: (1) Adding a sub-schedule that collects the derivative exposures at a legal-entity netting-agreement level for the top 25 non-central clearing counterparty ("non-CCP") and non-G-7 counterparties, as well as all CCPs and the G-7 counterparties, that includes a breakout of collateral into cash and non-cash, and exposures into 14 asset categories; (2) changing the current SFT sub-schedule to collect exposures and collateral separately at a counterparty legal-entity netting-agreement level for the top 25 non-CCP and non-G-7 counterparties, as well as all CCPs and the G-7 counterparties, and adding asset sub-categories for a total of 30 specific asset types; (3) removing all columns with the institution specification of margin period of risk ("MPOR") under the global market shocks from sub-schedules F.1.a through F.1.e and F.2; (4) removing the column Loss Given Default Derived from Unstressed Probability of Default on F.2; and (5) adding columns to worksheet F.1.e to collect both gross and net stressed and unstressed current exposure to central clearing counterparties.

Burden Estimates

The FDIC estimates the burden of this collection as follows:

Current

Number of Respondents: 4.

Annual Burden per Respondent: 1,040 hours.

Total Annual Burden: 4,160 hours.

Proposed

Estimated Number of Respondents: 4.
Annual Burden per Respondent: 1,040 hours.

Estimated Total Annual Burden: 4,160 hours.

The FDIC recognizes that the Board has estimated 88,341 hours for bank holding companies to prepare the Summary, Macrosenario, Operational risk, Regulatory capital transitions, Regulatory capital instruments, and Counterparty credit risk schedules submitted for the FR Y-14A. The FDIC believes that the systems covered institutions use to prepare the FR Y-14A reporting templates will also be used to prepare the reporting templates described in this notice. Comments continue to be invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the FDIC, including whether the information has practical utility;

(b) The accuracy of the FDIC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated at Washington, DC, this 24th day of September.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.
