Proposed Amendment of Class D and E Airspace; Victorville, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

Additional Class D airspace is needed for Instrument Flight Rules (IFR) operations at Southern California Logistics Airport that would allow aircraft operations outside Class D at Adelanto Airport. This action is necessary for the safety and management of Instrument Flight Rules (IFR) aircraft utilizing both airports. This action also would note the airport name change.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267-9677, for a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying Class D airspace extending upward from the surface to and including 5,400 feet MSL within a 6-mile radius of Southern California Logistics Airport, Victorville, CA excluding that airspace within a 1.5-mile radius of Adelanto Airport. This would enhance the safety and management of IFR operations at both airports. This action also would adjust the geographic coordinates and change the airport name from Southern California International Airport to Southern California Logistics Airport, in both Class D and E airspace descriptions. Class D and E airspace designations are published in paragraph 5000, and 6005, respectively, of FAA Order 7400.9T, signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class D and E airspace designations listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This Rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies controlled airspace at Southern California Logistics Airport, Victorville, CA.
