

motor vehicles and non-road engines, as defined in the CAA. Motor vehicles and non-road engines not meeting the applicable definitions are excluded from compliance with current regulations. A manufacturer may make an exclusion determination by itself; however, manufacturers and importers may routinely request EPA to make such determination to ensure that their determination does not differ from the Agency's. To request an exclusion determination, manufacturers submit a letter with a description of the engine and/or vehicle (engine type, horsepower rating, intended usage etc.,) and sales brochures, to the Compliance and Innovative Strategies Division (CISD), Heavy-Duty and Nonroad Engines Group (HDNEG), Office of Transportation and Air Quality (OTAQ). CISD uses this information to determine whether the engine or vehicle is excluded from compliance with one or more emission regulations. CISD then stores the data in its internal files, and makes it available to environmental groups and the public upon request under the Freedom of Information Act.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average seven hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:*

*Estimated total number of potential respondents: 12.*

*Frequency of response: Annual or on occasion.*

*Estimated total average number of responses for each respondent: 3.*

*Estimated total annual burden hours: 69.*

*Estimated total annual costs: \$5,654. This includes an estimated burden cost of \$5,538 and an estimated cost of \$116*

for capital investment or maintenance and operational costs.

### **Are There Changes in the Estimates from the Last Approval?**

To date, there are no changes in the number of hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. However, EPA is still evaluating information that may lead to a change in the estimates.

### **What Is the Next Step in the Process for These ICRs?**

EPA will consider the comments received and amend the ICRs as appropriate. The final ICR packages will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

### **Component Concepts Superfund Site; Thomasville, Davidson County, NC; Notice of Settlement**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of Settlement.

**SUMMARY:** Under section 122(h)(1) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the United States Environmental Protection Agency has entered into a settlement for reimbursement of past response costs concerning the Component Concepts Site located in Thomasville, Davidson County, North Carolina for publication.

**DATES:** The Agency will consider public comments on the settlement until July 30, 2008. The Agency will consider all comments received and may modify or withdraw its consent to the settlement if comments received disclose facts or considerations, which indicate that the

settlement is inappropriate, improper, or inadequate.

**ADDRESSES:** Copies of the settlement are available from Ms. Paula V. Painter. Submit your comments, identified by Docket ID No. EPA-RO4-SFUND-2008-0500 or Site name Component Concepts Superfund Site by one of the following methods:

- <http://www.regulations.gov>: Follow the on-line instructions for submitting comments.

- *E-mail:* [Painter.Paula@epa.gov](mailto:Painter.Paula@epa.gov).

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-8686-6]

### Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health; Draft Technical Support Document, Volume 3: Development of Site-Specific Bioaccumulation Factors

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of availability of draft for scientific views.

**SUMMARY:** In 2000, EPA announced the availability of final revisions to the *Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health (2000)* (hereafter “2000 Human Health Methodology”) published pursuant to section 304(a)(1) of the Clean Water Act (CWA). Along with the 2000 Human Health Methodology, EPA committed to publishing several technical support documents to provide additional detail to the Methodology document, including two documents that describe the development of bioaccumulation factors for use in ambient water quality criteria calculations. In 2003, EPA announced the release of the *Technical Support Document Volume 2: Development of National Bioaccumulation Factors* (hereafter “National BAF TSD”). Today, the

Agency is soliciting scientific views on the Draft *Technical Support Document, Volume 3: Development of Site-Specific Bioaccumulation Factors* (hereafter “Draft Site-Specific BAF TSD”) that accompanies the Methodology and the National BAF TSD. The National BAF TSD contains technical details on how EPA develops national bioaccumulation factors for use in deriving national recommended ambient water quality criteria for protecting human health. The Draft Site-Specific BAF TSD contains technical details on how States and Tribes may develop site-specific bioaccumulation factors for use in deriving site-specific ambient water quality criteria for protecting human health. The goal in deriving site-specific BAFs is to determine the most accurate estimates of bioaccumulation feasible for each site.

**DATES:** Scientific views must be received on or before August 14, 2008. Scientific views postmarked after this date may not receive the same consideration.

**ADDRESSES:** Submit your scientific views, identified by Docket ID No. EPA-HQ-OW-2008-0494, by one of the following methods:

- <http://www.regulations.gov>: Follow the on-line instructions for submitting scientific views.

- *E-mail:* [OW-Docket@epa.gov](mailto:OW-Docket@epa.gov).

- *Mail:* U.S. Environmental Protection Agency; EPA Docket Center (EPA/DC) Water Docket, MC 2822T; 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

- *Hand Delivery:* EPA Docket Center, 1301 Constitution Ave, NW., EPA West, Room 3334, Washington DC. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

**Instructions:** Direct your scientific views to Docket ID No. EPA-HQ-OW-2008-0494. EPA's policy is that all scientific views received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. ## SUPPLEMENTARY INFORMATION:

### I. General Information

#### A. Does This Action Apply to Me?

The intended audience for the Draft Site-Specific BAF TSD includes State and Tribal water quality staff scientists or risk assessors (“investigators”) who are responsible for deriving State or Tribal water quality standards, stakeholders interested in developing site-specific BAFs, and other users interested in site-specific bioaccumulation issues for other applications.
