SUPPLEMENTARY INFORMATION:

I. Abstract

Amendment 80 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP), primarily allocates BSAI non-pollock trawl groundfish fisheries among fishing sectors and facilitates the formation of harvesting cooperatives in the head-and-gut trawl catcher/processor sector. Sector allocations and associated cooperatives allow participants to focus less on harvest rate maximization and more on optimizing their harvest. This, in turn, allows a reduction in unwanted incidental catch, improved retention, improved utilization, and improved economic health of the head-and-gut trawl catcher/processor sector. Amendment 80 established a limited access privilege program for the non-American Fisheries Act (non-AFA) trawl catcher/processor sector.

The Amendment 80 permits and reports collection provides participants with a management system that allows for improved efficiency by providing an environment in which, revenues can be increased and operating costs can be reduced. Depending on the magnitude of these potential efficiency gains and the costs of bycatch reduction, increases in efficiency could be used to cover the costs of bycatch reduction measures or provide additional benefits to participants.

Licenses and vessels used to qualify for the Amendment 80 Program (either to be included in the non-AFA trawl catcher/processor sector or to be used in Amendment 80 cooperative formation) are restricted from being used outside of the Amendment 80 sector, except that any eligible vessel authorized to fish pollock under the AFA would still be authorized to fish under this statute.

The fishery participants that join a cooperative receive an exclusive harvest privilege not subject to harvest by other vessel operators; may consolidate fishing operations on a specific vessel or subset of vessels, thereby reducing monitoring and enforcement and other

operational costs; and harvest fish in a more economically efficient and less wasteful manner.
