DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Project: Disaster Technical Assistance Center Disaster Mental Health Needs Assessment and Customer Satisfaction Survey—NEW

SAMHSA created the SAMHSA Disaster Technical Assistance Center (SAMHSA DTAC) in 2002. SAMHSA DTAC provides technical assistance (TA) to States, Territories, and Federally recognized tribes (hereafter referred to as ‘States’), as well as any behavioral health worker, in response to, and in preparation for, behavioral health (mental health and substance abuse) needs associated with catastrophic events and emergencies, such as natural disasters, bioterrorism, mass criminal victimization, and environmental disasters. In the aftermath of a disaster or other traumatic event, State and local behavioral health agencies can contact SAMHSA DTAC for assistance with the resulting mental health and substance abuse needs. SAMHSA DTAC TA specialists respond by identifying suitable publications and other materials, arranging for the deployment of expert consultants, or coordinating other support services. For Presidentially declared disasters, SAMHSA DTAC assists States that are eligible for a Crisis Counseling Assistance and Training Program (CCP) grant by providing TA related to completing applications, developing a plan of services, and identifying staff needs for the CCP.

SAMHSA is proposing two new data collection efforts: the Disaster Behavioral Health Needs Assessment (DBHNA) and the Customer Satisfaction Survey. The DBHNA will assess the current gaps and needs at the State and local provider levels in disaster behavioral health (DBH) planning and response efforts. The Customer Satisfaction Survey is being conducted to ensure that the TA SAMHSA DTAC provides is on track, applicable, useful,

and well received. Both of these proposed data collection efforts will provide feedback on the ongoing needs at the national, State, and local levels and identify areas in which State and local providers require enhanced TA services.

SAMHSA DTAC will be responsible for administering the two data collection instruments and analyzing the data. SAMHSA DTAC will use data from both instruments to inform current and future TA activities and to ensure these activities continue to align with State and local needs.

The components of the data collection are listed and described below, and a summary table of the number of respondents and respondent burden has also been included.

Disaster Behavior Health Needs Assessment. The DBHNA will assist SAMHSA DTAC in identifying jurisdictions that need assistance with integrating behavioral health (which includes both mental health and substance abuse services) into their preparedness plans. SAMHSA DTAC will use the DBHNA to identify gaps and trends in crisis counseling planning across the country and to inform future TA and training for State and local behavioral health authorities so that these gaps can be addressed at the State and local levels. The DBHNA will be administered annually. The information collected will inform the DBH training and TA that SAMHSA DTAC provides. With improved training and TA, SAMHSA DTAC will be better positioned to support States, local providers, and other organizations in their efforts to integrate DBH into “all-hazards” disaster preparedness and response.

There are two versions of the DBHNA: The State/Territory Coordinator Disaster Behavioral Health Needs Assessment and the Local Provider Disaster Behavioral Health Needs Assessment. These DBHNAs will collect information on the current needs and challenges that State coordinators and local providers face when integrating DBH preparedness and response into all-hazards plans. Both versions of the survey will be administered online and will be programmed to include simplified screens and intuitive navigational controls, and both will use branching so that each respondent will be presented with only those questions relevant to his or her State or program.

The State/Territory Coordinator version will be administered to all disaster mental health coordinators, disaster substance abuse coordinators, and DBH coordinators (coordinators responsible for both mental health and
