Once in the system, select "search," then key in the docket ID number identified in this document.

What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable us to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the Docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What information collection activity or ICR does this apply to?

Affected entities: Entities potentially affected by this action (*with SIC Code/2002 NAICS Code indicated in parentheses*) are refiners (2911/324110), importers (5172/424720), pipelines (4613), petroleum marketers and other distributors (5171, 5172/424710, 424720), terminals (5171/424710), fuel oil dealers (5172/424720), fuel additive manufacturers (2911/424720), petroleum retailers and wholesale purchaser-consumers (5171, 5172/424710, 424720) and laboratories (8734/541380).

Title: Recordkeeping and Reporting Requirements for Motor Vehicle and Non-Road Diesel Fuel.

ICR numbers: EPA ICR No. 1718.09, OMB Control No. 2060-0308.

ICR status: This ICR is currently scheduled to expire December 31, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9. They are also displayed by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR covers recordkeeping and reporting requirements for motor vehicle diesel fuel and non-road, locomotive and marine diesel fuel. It also includes recordkeeping and reporting associated with the placement of codes on dyed diesel fuel (the dye is required under IRS regulations). The main purpose for recordkeeping and reporting is to ensure compliance with the regulations at 40 CFR part 80, *Subpart I—Motor Vehicle, Non-Road, Locomotive, and Marine Diesel Fuel*. Most reporting is mandatory. Parties may assert a claim of business confidentiality and

submissions covered by such a claim will be treated in accordance with procedures at 40 CFR part 2 and established Agency procedures.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average less than one hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

A document entitled "Proposed Supporting Statement—Part A: Recordkeeping and Reporting Related to Fuel Quality Regulations for Diesel Fuel Sold in 2001 & Later Years; for Tax-Exempt (Dyed) Highway Diesel Fuel; and Non-Road Locomotive & Marine Diesel Fuel: Renewal" has been placed in Docket No. EPA-HQ-OAR-2007-1121. This draft document provides a more detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 6,806.

Frequency of response: Annual, quarterly and/or on occasion.

Estimated total number of responses: 265,406.

Estimated total average number of responses for each respondent: 39.

Estimated total annual burden hours: 18,950.

Estimated total annual costs: \$2,044,300.

Are there changes in the estimates from the last approval?

There is a decrease in the total estimated respondent burden and cost compared to the currently approved ICR. Most of the decrease is because motor vehicle diesel reporting requirements are no longer applicable and because virtually all laboratory qualifications for test methods have already been submitted to, and acted upon by, EPA.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: August 12, 2011.

Lori Stewart,

Acting Director, Office of Transportation and Air Quality, Office of Air and Radiation.
