

alter the site, or change the operation of the site. Therefore, there is no significant construction impact. Therefore, the requirements of 10 CFR 51.22(c)(25)(iv) are met.

Requirement in 10 CFR 51.22(c)(25)(v)

To qualify for a categorical exclusion under 10 CFR 51.22(c)(25)(v), the exemption must involve “no significant increase in the potential for or consequences from radiological accidents.” The proposed exemption does not remove the requirement to perform leakage rate testing of the MSIVs. This exemption will allow the leakage testing to be performed in a manner consistent with the way MSIV leakage is modeled in the revised radiological consequence analysis submitted as part of the related license amendment request. Therefore, this change to the leakage rate measurement does not result in a significant increase in the potential for or consequences from radiological accidents. Therefore, the requirements of 10 CFR 51.22(c)(25)(v) are met.

Requirement in 10 CFR 51.22(c)(25)(vi)

To qualify for a categorical exclusion under 10 CFR 51.22(c)(25)(vi)(C), the exemption must involve inspection or surveillance requirements. The exemption seeks to permit exclusion of the MSIV leakage from the overall integrated leak rate Type A test measurement and the combined leakage rate of all penetrations and valves subject to Type B and Type C tests required by Appendix J to 10 CFR part 50. Appendix J specifies the leakage rate test requirements, schedules, and acceptance criteria for tests of the leak-tight integrity of the reactor containment, and systems and components that penetrate the containment. Therefore, the exemption involves a surveillance requirement. Therefore, the requirements of 10 CFR 51.22(c)(25)(vi) are met.

Conclusion

Based on the above, the NRC staff concludes that the proposed exemption meets the eligibility criteria for the categorical exclusion set forth in 10 CFR 51.22(c)(25). Therefore, in accordance with 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the NRC’s issuance of this exemption.

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to

the public health and safety, and is consistent with the common defense and security. Also, special circumstances are present. Therefore, the Commission hereby grants EGC a permanent exemption (1) from the requirements of 10 CFR part 50, Appendix J, Option B, Section III.A, to allow exclusion of the MSIV pathway leakage from the overall integrated leakage rate measured when performing a Type A test; and (2) from the requirements of 10 CFR part 50, Appendix J, Option B, Section III.B, to allow exclusion of the MSIV pathway leakage from the combined leakage rate of all penetrations and valves subject to Types B and C tests for DNPS.

This exemption is effective upon issuance.

Applicant’s Representations

1. The Applicant is a policy and development finance organization established in October 2008 by the Japanese Government pursuant to the Development Bank of Japan Inc. Act (the “DBJ Act”). The Applicant’s primary mission is contributing to the

sustainable growth of the Japanese economy, promoting stable and vital financial markets in Japan and enhancing global competitiveness of Japanese businesses. The Applicant furthers its mission primarily through the provision of long-term funding to enterprises and projects generally in line with the policy objectives of the Japanese Government, through loan financing and other financing methods (including equity investments).

2. In serving its mission, the Applicant offers a broad range of financial products and services to its clients similar to those offered by Japanese commercial banks. In recent years, the Applicant has also undertaken specific mandates in two key Japanese Government-sponsored funding initiatives: (i) “Crisis Response Operations,” a program designed to provide appropriate financing to large- and medium-sized enterprises that are temporarily experiencing a downturn in business performance and funding difficulties due to a “crisis” such as turmoil in the domestic or global financial system, large-scale natural disasters, acts of terrorism or medical epidemics, and (ii) “Special Investment Operations,” a temporary investment program designed to supplement and encourage private-sector financing to support growth initiatives of enterprises that contribute to self-reliant development of regional economies, contribute to development of markets for growth capital, or promote the competitiveness of Japanese enterprises generally.

3. As of March 31, 2020, the Applicant’s most recently completed fiscal year end, a majority of the Applicant’s assets consisted of loans and other securities such as equity in other entities and a variety of debt instruments. Because such loans and securities could be considered “investment securities” within the meaning of section 3(a)(1)(C) of the Act, the Applicant may be considered an investment company, and it requests an exemption from all provisions of the Act.

4. The Japanese Government currently owns 100% of the Applicant’s issued share capital. However, the DBJ Act (including successive amendments thereto) contemplates a plan to fully privatize the Applicant over time. Specific timing for commencing or completing the Applicant’s privatization has not been determined, and under partial amendments to the DBJ Act effective in 2015, the Japanese Government is obligated to hold more than one-half of the total issued share capital of the Applicant until the
