SUPPLEMENTARY INFORMATION:

Background

The Balanced Budget Act of 1997 (BBA) (Pub. L. 105-33) established the Medicare+Choice program. Under the BBA, HCFA must implement a risk adjustment methodology that accounts for variations in per capita costs based on health status and other demographic factors for payment to Medicare+Choice organizations (M+COs). Risk adjustment implementation must start no later than January 1, 2000.

The BBA also gives HCFA the authority to collect inpatient hospital data for discharges on or after July 1, 1997, and additional data for services occurring on or after July 1, 1998. The schedule for physician and hospital outpatient encounter data submission is as follows:

- October 1, 2000: Submission of physician data begins.
- January 1, 2001: Submission of hospital outpatient data begins with dates of services retroactive to October 1, 2000.

This notice announces a public meeting to provide an opportunity for M+COs, providers, practitioners, and other interested parties to obtain basic information on the data requirements for the collection of physician and hospital outpatient encounter data. HCFA intends to provide additional information on our data collection efforts, systems processes, training approach, and customer services. HCFA will also follow-up this meeting with intensive training in the areas of physician and hospital outpatient encounter data that will occur in June and September, respectively.

HCFA is announcing this public meeting to provide an overview of physician and hospital outpatient data and to allow for individuals and organizations familiar with issues related to physician and hospital outpatient data collection to raise questions that can be answered in

subsequent training. The agenda will include short presentations by HCFA staff and Aspen Systems Corporation, the encounter data training contractor, on related topics and will conclude with a question-and-answer session.
