

consult the Department's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at the Department.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218 (c).

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Notice of Jointly Owned Invention Available for Licensing

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of jointly owned invention available for licensing.

SUMMARY: The invention listed below is jointly owned by the U.S. Government, as represented by the Department of Commerce, and by Applied Research Associates, Inc. The Department of Commerce's interest in the invention is available for licensing in accordance with 35 U.S.C. 207 and 37 CFR part 404 to achieve expeditious commercialization of results of federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on this invention may be obtained by writing to: National Institute of Standards and Technology, Office of Technology Partnerships, Building 222, Room A242, Gaithersburg, MD 20899. Information is also available via telephone: 301-975-2649, fax 301-975-3482, or e-mail: nathalie.rioux@nist.gov. Any request for information should include the NIST Docket number or Patent number and title for the invention as indicated below.

The invention available for licensing is:

[NIST DOCKET NUMBER: 10-004]

Title: Gradient Elution Moving Boundary Electrophoresis for the Analysis of Complex Samples and Detection of Toxins.

final sunset regulations at 19 CFR 351.218(d)(4). As provided in 19 CFR 351.302(b), however, the Department will consider individual requests to extend that five-day deadline based upon a showing of good cause.

Abstract: Methods of detecting the presence of toxins in a sample using electrophoretic separations and of performing electrophoretic separation of complex samples are provided. The method of detecting the presence of toxins includes reacting a sample and a substrate with a signaling enzyme which converts the substrate to the product in a reaction medium, introducing a run buffer into a separation channel having an inlet end, selectively introducing at least one of the substrate and the product of the reaction medium into the inlet end of the separation channel, electrophoretically separating the substrate and the product, and determining the rate of conversion of the substrate to the product, wherein a change in the rate of conversion is indicative of the presence of toxins. The method of performing electrophoretic separations of complex samples having charged particulates and oppositely charged analytes comprises introducing a run buffer into a separation channel having an inlet end, selectively introducing the oppositely charged analytes in the complex sample into the separation channel, and electrophoretically separating the charged particulates and the oppositely charged analytes. Additionally, a device for varying with respect to time the bulk flow of a fluid in a separation channel of an electrophoretic device having a buffer reservoir in fluid contact with the separation channel is provided. The device includes a pressure sensor in fluid contact with a buffer reservoir, a high pressure reservoir in selective fluidic communication with the buffer reservoir, a low pressure reservoir in selective fluidic communication with the buffer reservoir and in fluidic communication with the high pressure reservoir, and a pumping device for pumping a gas from the low pressure reservoir to the high pressure reservoir.

Dated: May 25, 2010.

Katharine B. Gebbie,

Director, Physics Laboratory.

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XW62

Fisheries of the Exclusive Economic Zone off Alaska; Stock Assessment of Eastern Bering Sea Pollock; Peer Review Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: NMFS has requested the Center for Independent Experts (CIE) to conduct a peer review of the agency's stock assessment of Eastern Bering Sea walleye pollock (*Theragra chalcogramma*). The CIE, operated by Northern Taiga Ventures, Inc., provides independent peer reviews of NMFS's fisheries stock assessments. The Eastern Bering Sea pollock stock assessment is reviewed annually by the Alaska Fisheries Science Center, the North Pacific Fishery Management Council (NPFMC) Plan Team, and the NPFMC Scientific and Statistical Committee. The CIE review will examine whether the assessment incorporates the best available scientific information and provides a reasonable approach to understanding the population dynamics and stock status of Eastern Bering Sea pollock. The public is invited to attend and observe the presentations and discussions between the CIE panel and the NMFS scientists who collected and processed the data, and designed the underlying model.

DATES: The public meeting will be held from June 28 through July 2, 2010, 9 a.m. to 5 p.m. Pacific Standard Time.

ADDRESSES: The review will be held at the NMFS Alaska Fisheries Science Center, 7600 Sand Point Way N.E., Building 4, Seattle, WA 98115. Photo identification is required to enter this facility.

FOR FURTHER INFORMATION CONTACT: James Ianelli, 206-526-6510.

SUPPLEMENTARY INFORMATION: The CIE panel will consist of three peer reviewers who will assess materials related to the topic, participate in a review workshop with the NMFS scientists who developed the model and the analytical approach, and produce a report. This review will be highly technical in nature and will cover mathematical details of the analytical approach. More information about the CIE is available on its website at www.ciereviews.org.

Members of the public are invited to observe, and will be provided opportunities to contribute on June 28 and July 2, 2010. The final report will be available prior to the September NPFMC Plan Team meetings and will consist of individual reports from each panelist and a summary report. The results of the review will be presented during the September 2010 NPFMC Plan Team meeting, which will be announced at a later time in the **Federal Register**.

Special Accommodations

These workshops will be physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Pat Livingston, 206-526-4172, at least 10 working days prior to the meeting date.

Dated: May 26, 2010.

Carrie Selberg,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Institute of Standards and Technology

National Conference on Weights and Measures 95th Annual Meeting

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The Annual Meetings of the 95th National Conference on Weights and Measures (NCWM) will be held July 11 to 15, 2010. Publication of this notice on the NCWM's behalf is undertaken as a public service; NIST does not endorse, approve, or recommend any of the proposals contained in this notice or in the publications of the NCWM mentioned below. The meetings of the NCWM are open to the public but registration is required.

DATES: The meeting will be held on July 11-15, 2010.

ADDRESSES: The meeting will be held at the Crowne Plaza St. Paul-Riverfront Hotel, 11 East Kellogg Boulevard, St. Paul, Minnesota 55101.

FOR FURTHER INFORMATION CONTACT: Carol Hockert, Chief, NIST, Weights and Measures Division, 100 Bureau Drive, Stop 2600, Gaithersburg, MD 20899-2600 or by telephone (301) 975-5507 or at Carol.Hockert@nist.gov by e-mail. Registration is required to attend this meeting. Please see NCWM Pub 16 "Committee Reports for the 95th

National Conference on Weights and Measures" at <http://www.ncwm.net> or <http://www.nist.gov/owm> to review the full meeting agenda, registrations forms, and hotel reservation information.

SUPPLEMENTARY INFORMATION: The NCWM is a voluntary organization of weights and measures officials of the states, counties, and cities of the United States, Federal agencies, and private sector representatives. These meetings bring together government officials and representatives of business, industry, trade associations, and consumer organizations on subjects related to the field of weights and measures technology, administration, and enforcement. NIST participates in the NCWM to promote uniformity among the states in laws, regulations, methods, and testing equipment that comprise the regulatory control of commercial weighing and measuring devices and other practices used in trade and commerce.

The following are brief descriptions of some of the significant agenda items that will be considered along with other issues at the NCWM Annual Meeting. Comments will be taken on these and other issues during several public comment sessions. At this stage, the items are proposals. This meeting also includes work sessions in which the Committees may also accept oral and written comments where they will finalize recommendations for NCWM consideration and possible adoption at its voting sessions which are tentatively scheduled for July 14 and 15, 2010. The Committees may withdraw or carry over items that need additional development.

The Specifications and Tolerances Committee (S&T Committee) will consider proposed amendments to NIST Handbook 44, "Specifications, Tolerances, and other Technical Requirements for Weighing and Measuring Devices (NIST Handbook 44)." Those items address weighing and measuring devices used in commercial applications, that is, devices that are normally used to buy from or sell to the public or used for determining the quantity of product sold among businesses.

Issues on the agenda of the NCWM Laws and Regulations Committee (L&R Committee) relate to proposals to amend NIST Handbook 130, "Uniform Laws and Regulations in the area of legal metrology and engine fuel quality" and NIST Handbook 133 "Checking the Net Contents of Packaged Goods." These documents are available on the Internet at <http://www.nist.gov/owm>.

This notice contains information about significant items on the NCWM

Committee agendas, but does not include all agenda items. As a result, the following items are not consecutively numbered.

NCWM Specifications and Tolerances Committee

The following items are proposals to amend NIST Handbook 44:

General Code

Item 310-4. G-A.6. Nonretroactive Requirements (Remanufactured Equipment)—The NCWM will consider adoption of a revision to a current requirement to clarify the intent of the 2001 decision regarding the application of a variety of nonretroactive requirements to devices that have been classified to have been "remanufactured" (*i.e.*, a device that is disassembled, checked for wear, parts replaced or fixed, reassembled and made to operate like a new device of the same type) as compared with a "manufactured device" which is a commercial weighing or measuring device shipped as new from the original equipment manufacturer.

Scales Code

Item 320-2. S.1.7. Automatic Zero-Setting Mechanism (AZSM)—The NCWM will consider adoption of a proposal to define the acceptable operating parameters of the zero-setting functions used on some electronic weighing devices. These functions automatically maintain a scale's indications at zero when no load is on the device. Existing NIST Handbook 44 requirements prohibit some of the zero-setting functions found on weighing devices designed and sold for use in other countries when those devices are used in commercial applications in the U.S. marketplace. The intent of the proposal is to retroactively prohibit the use of this feature on scales used in commercial transactions.

Vehicle Tank Meter Code

Item 331-1. T.2.1. Automatic Temperature-Compensating Systems (ATC) on Vehicle Tank Meters (These systems may be used on existing vehicle mounted meters that are typically used to deliver home heating fuel and other products to residential and business consumers.)—The NCWM will consider adoption of the proposal to revise the existing tolerances applicable to comparisons of test results between compensated and non-compensated test runs on vehicle tank meters equipped with ATC systems to better reflect the actual performance capability of these systems.
