RIN 0648–BM94

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Fishery Management Plans of Puerto Rico, St. Croix, and St. Thomas and St. John; Amendment 2

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to implement management measures described in Amendment 2 to the Puerto Rico Fishery Management Plan (FMP), Amendment 2 to the St. Croix FMP, and Amendment 2 to the St. Thomas and St. John FMP (jointly Amendment 2), as prepared by the Caribbean Fishery Management Council (Council). If implemented, this proposed rule and Amendment 2 would prohibit and restrict the use of certain net gear in U.S. Caribbean Federal waters and would require a descending device to be available and ready for use on vessels when fishing for federally managed reef fish species in U.S. Caribbean Federal waters. The purpose of this proposed rule and Amendment 2 is to protect habitats and species from the potential negative impacts associated with the use of certain net gear and to enhance the survival of released reef fish in U.S. Caribbean Federal waters.

DATES: Written comments must be received no later than October 30, 2024.

ADDRESSES: A plain language summary of this proposed rule is available at <https://www.regulations.gov/docket/NOAA-NMFS-2024-0084>. You may submit comments on this document, identified by “NOAA–NMFS–2024–0084” by either of the following methods:

SUPPLEMENTARY INFORMATION: NMFS, with the advice of the Council, manages the Puerto Rico, St. Croix, and St. Thomas and St. John fisheries in U.S. Caribbean Federal waters under the Puerto Rico, St. Croix, and St. Thomas and St. John FMPs. The Council prepared the FMPs, which the Secretary of Commerce approved, and NMFS implements the FMPs through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Background

The Magnuson-Stevens Act requires NMFS and the regional fishery management councils to prevent overfishing and achieve, on a continuing basis, the optimum yield from federally managed fish stocks to ensure that fishery resources are managed for the greatest overall benefit to the nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems.
