SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. Improved Recovery From Low-Permeability Formations

AGENCY: National Energy Technology Laboratory (NETL), Department of Energy (DOE).

ACTION: Notice of Availability of a Financial Assistance Solicitation.

SUMMARY: Notice is hereby given of the intent to issue Financial Assistance Solicitation No. DE-PS26-01NT41121 entitled "Improved Recovery from Low-Permeability Formations". The objective of this solicitation is to demonstrate existing technologies and methodologies, or improve and demonstrate technologies with strong near-term commercialization potential, for increasing production from low-permeability "tight" gas formations. Demonstration of existing technologies should be relatively new to a basin or play.

An Information Package is available on the NETL's Homepage at <http://www.netl.doe.gov/business> for viewing and downloading. The Information Package contains general information regarding the proposed solicitation.

DATES: The solicitation will be available on the DOE/NETL's Internet address at <http://www.netl.doe.gov/business> on or about April 6, 2001. Prospective applicants are invited to E-mail any comments and/or questions associated with the information presented to Dona Sheehan via the Internet at sheehan@netl.doe.gov by COB on March 30, 2001 as a draft version of the solicitation will not be issued.

FOR FURTHER INFORMATION CONTACT:

Dona G. Sheehan, U.S. Department of Energy, National Energy Technology Laboratory, P.O. Box 10940, MS 921-107, Pittsburgh, PA 15236-0940, E-mail Address: sheehan@netl.doe.gov, Telephone Number: 412/386-5918.

SUPPLEMENTARY INFORMATION: As new discoveries from conventional supplies decline, future supplies of natural gas will have to come increasingly from low-permeability (tight) reservoirs. The National Petroleum Council's (NPC) 1992 natural gas study concluded that 232 Tcf of gas could be technically recoverable from low-permeability formations, and assuming that technology improvements continued, the NPC estimated that 349 Tcf of gas could be produced. In their most recent study (1999), the NPC states that deeper resources, resources in deeper water, and nonconventional resources will be the key to future supply. However, under current limitations in exploration and production technology, only a small portion of this vast resource is economic to develop.

A significant portion of natural gas resources in low-permeability formations are found in deep reservoirs and in large gross intervals (over thousands of feet) with many potential pay zones. In addition, most low-permeability wells are marginally productive because an extensive, well-
