

- The second element of the Yuba Accord would be an agreement between YCWA and water districts within Yuba County (Yuba Accord Conjunctive Use Agreement) for the implementation of a comprehensive program of conjunctive use of surface water and groundwater supplies and actions to improve water use efficiencies.

- The third element would be an agreement between YCWA and the California Department of Water Resources (DWR) and Reclamation (Yuba Accord Transfer Agreement), which would put water released from the Yuba Project to beneficial uses through the Environmental Water Account and in the CVP and SWP service areas.

All three of these agreements would need to be in place for the Yuba Accord to be implemented.

The draft EIS/EIR will analyze the adverse and beneficial effects of implementing the Yuba Accord on surface water hydrology, groundwater hydrology, water supply, hydropower, flood control, water quality, fisheries, wildlife, vegetation, special-status species, recreation, visual, cultural and Indian Trust Assets, air quality, land use, socioeconomic, growth inducement, and environmental justice resources and conditions. Alternatives to be evaluated in the draft EIS/EIR include the No Action Alternative, Proposed Action Alternative, and others as appropriate. In addition, the draft EIS/EIR will address the cumulative impacts of implementation of the Yuba Accord in conjunction with other past, present, and reasonably foreseeable actions.
