

services that support global spaceflight safety, space sustainability, and international coordination. In order to provide these services, TraCSS will enable spacecraft operators and national governments to register for the system. This will require the provision of information by these users as part of the registration process. Spacecraft operators are also asked to provide relevant operational information on an ongoing basis to facilitate provision of safety services.

The purpose of this collection is to enable TraCSS users (spacecraft operators and national governments) to register and receive spaceflight safety services from the system. The registration information will include organizational contact information, a list of spacecraft associated with that user, and additional attributes associated with that spacecraft. Spacecraft operators will also provide an operational point of contact. In addition to information provided as part of the registration process, spacecraft operators will provide additional information, such as ephemerides with covariance and maneuver plans on an ongoing basis. The provision of this information enables TraCSS to provide spaceflight safety services to users.

II. Method of Collection

Information will be collected via an online registration system (for registration) as well as through an online operational system (for ongoing data).
