[Docket No. CP23-29-000]

Saguaro Connector Pipeline, LLC; Notice of Availability of the Environmental Assessment for the Proposed Saguaro Connector Pipeline Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Saguaro Connector Pipeline Project (Project), proposed by Saguaro Connector Pipeline, LLC (Saguaro) in the above referenced docket. Saguaro requests authorization from the Commission to construct, install, operate, and maintain an approximate 1,000-foot, 48-inch-diameter natural gas pipeline in Hudspeth County, Texas. The proposed Project would cross the United States and Mexico International Boundary below the Rio Grande. According to Saguaro, the Project would serve as an interconnection to transport natural gas produced in Texas to a pipeline in Chihuahua, Mexico. The 48-inch-diameter natural gas pipeline is designed for a capacity of 2.834 billion standard cubic feet per day. The Project would not have permanent aboveground facilities.

The EA assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The Project includes the following components:

- approximately 1,000 feet of 48-inch-diameter natural gas pipeline;
- approximately 1,000 feet of 50-foot-wide permanent right-of-way;
- additional temporary workspaces (total of 14.2 acres); and
- 6.9 miles of temporary access road (Indian Hot Springs Road).

The Commission mailed a copy of the *Notice of Availability* of the EA to Federal, State, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. The EA is only available in electronic format. It may be viewed and downloaded from the FERC's website (www.ferc.gov), on the natural gas environmental documents page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). In addition, the EA may be accessed by using the eLibrary link on the FERC's website. Click on the eLibrary link (<https://elibrary.ferc.gov/eLibrary/search>) select "General Search" and enter the docket number in the "Docket Number" field, excluding the last three digits (*i.e.*, CP23-29). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659.

The EA is not a decision document. It presents Commission staff's independent analysis of the environmental issues for the Commission to consider when addressing the merits of all issues in this proceeding. Any person wishing to comment on the EA may do so. Your comments should focus on the EA's disclosure and discussion of potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to
