H. To Federal and foreign government intelligence or counterterrorism agencies or components where USCIS becomes aware of an indication of a threat or potential threat to national or international security, or where such use is to assist in anti-terrorism efforts and disclosure is appropriate to the proper performance of the official duties of the person making the disclosure;

I. To a Federal, State, local, tribal, territorial, foreign, or international agency, if necessary to obtain information relevant to a Department of Homeland Security decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in the system will be stored in a central computer database.

RETRIEVABILITY:

A combination of the following BCS data elements may be used to initiate a query in order to retrieve data from the BCS User Interface. These data elements include, an individual's Alien File Number; Name and Date of Birth; and Receipt Number.

SAFEGUARDS:

Information in this system is safeguarded in accordance with applicable laws and policies, including the DHS Information Technology Security Program Handbook. All records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include restricting access to authorized personnel who have a need-to-know, using locks, and password protection identification features. The system is also protected through a multi-layer security approach. The protective strategies are physical, technical, administrative and environmental in nature and provide access control to sensitive data, physical access control to DHS facilities, confidentiality of communications, authentication of sending parties, and personnel screening to ensure that all personnel with access to data are screened through background investigations commensurate with the level of access required to perform their duties.

RETENTION AND DISPOSAL:

The following USCIS proposal for retention and disposal is pending approval by the National Archives and Records Administration. Records are stored and retained in the BCS Repository for 75 years, during which time the records will be archived. Background checks are conducted on individuals/petitioners from the age of 14 and up. The 75 year retention rate comes from the length of time USCIS may interact with a customer. Further, retaining the data for this period of time will enable USCIS to fight identity fraud and misappropriated benefits.
