

### Alternatives to This Proposed Rule

The committee discussed alternatives to this change. One option considered was using one of the three prior year's domestic shipments to compute trade demand, pursuant to § 989.54(a) of the order. However, the order permits this only if the prior year's domestic shipments were limited due to crop conditions. Since 2009–10 shipments have increased, the committee concluded this option was not viable.

Another alternative considered was utilizing the computed trade demand formula in the order and using all available funds to support the ERO. However, the committee estimates that the funds remaining from the 2009–10 reserve pool would only support the ERO through August 2010, which would leave the industry without assets to support an ERO for eleven months of the season.

A third alternative considered was to maintain the existing language from § 989.154(b) and making it applicable to the 2010–11 crop year. (Section 989.154(b) currently authorizes the committee to use an estimated trade demand for the 2008–09 season only.) However, merely making a recommendation to change the applicable crop year did not address the potential needs of the industry. The existing language limited the committee by mandating that no reserve would be established if the 2010–11 crop estimate were less than 215,000 natural condition tons. After a series of discussions from two subcommittees, the committee determined that a more appropriate lower threshold for utilizing estimated trade demand would be 110 percent of the prior year's domestic shipments rather than a fixed quantity of 215,000 tons.

This proposed rule provides parameters for implementing volume regulation, if necessary, for 2010–11 crop NS raisins for the purposes of stabilizing the domestic market and maintaining a portion of the industry's export markets.

Accordingly, this action would not impose any additional reporting or recordkeeping requirements on either small or large raisin handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen

access to Government information and services, and for other purposes.

USDA has not identified any relevant Federal rules that duplicate, overlap or conflict with this proposed rule.

In addition, the committee's Rulemaking Work Group and the Administrative Issues Subcommittee each deliberated this issue at their meetings on May 11 and May 13, 2010, respectively, prior to the committee's meeting on May 13, 2010. All three meetings were widely publicized throughout the raisin industry, and all interested persons were invited to attend the meetings and encouraged to participate in subcommittee and committee deliberations on all issues. Like all subcommittee and committee meetings, the May 11 and 13, 2010, meetings were public meetings; and all entities, both large and small, were able to express their views on this issue. Finally, interested persons are invited to submit comments on this proposed rule, including the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/MarketingOrdersSmallBusinessGuide>.

Any questions about the compliance guide should be sent to Antoinette Carter at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 15-day comment period is provided to allow interested persons to respond to this proposal. Fifteen days is deemed appropriate because this action, if adopted, should be in place by the beginning of the 2010–11 crop year, August 1. All written comments timely received will be considered before a final determination is made on this matter.
