SUPPLEMENTARY INFORMATION: In 2011 the America COMPETES Reauthorization Act of 2010 was signed into law, authorizing the United States government to issue competitions in the areas of technology, education and science. The \$10 million SunShot Prize: America's Most Affordable Rooftop Solar challenges the ingenuity of America's businesses and communities to make it faster, easier, and cheaper to install rooftop solar energy systems. Successful competitors will domestically deploy at least 5,000 new rooftop photovoltaic (PV) installations at average pre-subsidy sales price of \$2 per watt before January 1, 2015. Winners will break a significant price barrier, considered to be unachievable a decade ago. Winners will prove that they can repeatedly achieve a \$2 per watt install price using innovative, verifiable processes and business practices.

Today's notice announces the availability of draft procedures for administration of the prize competition. The DOE will consider any comments received by July 13, 2012 in adopting these procedures.

Issued in Denver, Colorado, on June 13, 2012.

Assistant Secretary, Office of Energy Efficiency and Renewable Energy.
