

Canadian airspace. These factors cause flight plan processing issues for ERAM. Terminating the routes at a navigation aid facility prior to the border will resolve these issues.

The Rule

The FAA is amending Title 14, Code of Federal Regulations (14 CFR) part 71 by terminating Jet Route J-37 at the Massena, NY, VHF omnidirectional range/tactical air navigation (VORTAC) facility; and terminating Jet Route J-55 at the Presque Isle, ME, VHF omnidirectional range/distance measuring equipment (VOR/DME) facility. This action will enhance the safety and management of aircraft operations within the National Airspace System.

Jet routes are published in paragraph 2004 of FAA Order 7400.9T dated August 27, 2009 and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The jet routes listed in this document will be subsequently published in the Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends a portion of the en route

structure to enhance the safe and efficient use of the NAS in Florida.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," paragraph 311a and 311b. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.
