

license renewal period. Approval of the proposed action is not expected to result in any new construction or expansion of the existing ISFSI footprint beyond that previously approved by the NRC. The ISFSI is a passive facility that produces no liquid or gaseous effluents and requires no power or regular maintenance. No significant radiological or non-radiological impacts are expected from continued normal operations. Occupational dose estimates from routine monitoring activities and transfer of spent fuel for disposal are expected to be maintained as low as is reasonably achievable and are expected to be within the limits of Title 10 of the Code of Federal Regulations (10 CFR) 20.1201. The estimated annual dose to the nearest potential member of the public from ISFSI activities is less than 0.02 mSv/yr (2 mrem/yr), which is significantly less than limits specified in 10 CFR 72.104 and 10 CFR 20.1301(a). The staff concluded that the proposed 40-year renewal of NRC License SNM-

2505 will not result in a significant impact to the environment.

The NRC staff consulted with other federal and state agencies and Native American Indian tribes regarding the proposed action, including: The U.S. Fish and Wildlife Service, the National Oceanic and Atmospheric Administration (National Marine Fisheries Service), the Maryland Department of Natural Resources, the Maryland Department of the Environment, the Maryland Historic Trust, the Piscataway Indian Nation, the Piscataway Conoy Confederacy and Subtribes, the Cedarville Band of Piscataway Indians, and the Maryland Commission on African American History and Culture. These consultations ensured that the requirements of Section 7 of the Endangered Species Act and Section 106 of the National Historic Preservation Act were met and provided the designated state liaison agency the opportunity to comment on the proposed action and the EA.

II. Finding of No Significant Impact

On the basis of the EA, the NRC has concluded that the proposed license renewal will not significantly affect the quality of the human environment. Therefore, preparation of an environmental impact statement is not warranted for the proposed action and a finding of no significant impact is appropriate.
