

e.g., permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a Currently Approved Collection.

2. *The Title of the Form/Collection:* National Inmate Survey in Jails (NIS-4).

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* There is no agency form number at this time. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will primarily be State or Local Government entities. The work under this clearance will be used to produce estimates for the incidence and prevalence of sexual victimization within correctional facilities as required under the Prison Rape Elimination Act of 2003 (Pub. L. 108-79). The Bureau of Justice Statistics uses this information in published reports and for the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, and others interested in criminal justice statistics.

In 2003, the Prison Rape Elimination Act (PREA or the Act) was signed into law. The Act requires BJS to “carry out, for each calendar year, a comprehensive statistical review and analysis of the incidence and effects of prison rape.” The Act further instructs BJS to collect survey data: “. . . the Bureau shall. . . use surveys and other statistical studies of current and former inmates. . . .”

To implement the Act, BJS developed the National Prison Rape Statistics Program (NPRS), which includes four separate data collection efforts: the Survey on Sexual Violence (SSV), the National Inmate Survey (NIS), the National Survey of Youth in Custody (NSYC), and the National Former Prisoner Survey (NFPS). The NIS collects information on sexual victimization self-reported by inmates held in adult correctional facilities, both prisons and jails. The NIS has been conducted three times, in 2007 (NIS-1), in 2008-09 (NIS-2), and in 2011-12 (NIS-3). Each iteration of NIS was conducted in at least one facility in all 50 states and the District of Columbia. In each iteration of the survey, inmates completed the survey using an audio computer-assisted self-interview (ACASI), whereby they heard questions and instructions via headphones and

responded to the survey items via a touchscreen interface.

The collection requested in this notice is the fourth iteration of the National Inmate Survey in Jails. For NIS-4, administration of the survey in prisons will take place separately from survey administration in jails. This collection request is specific to conducting the survey in adult jail facilities.

BJS submitted this collection for approval in summer 2022. Since then, changes have been made to several items in the collection. The main differences include editing of items in the ACASI survey and facility questionnaire, removal of items from the facility questionnaire, editing of sampling plan, and editing of consent forms and scripts.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Prior to data collection commencing in 2023, BJS will coordinate the logistics of NIS-4 survey administration with staff at jail facilities. It is estimated that 290 facility respondents will devote 150 minutes of time to this coordination effort, not including staff escort time. During data collection in 2023, jail staff will escort an estimated 65,360 jail inmates to/from the interviews, which consists of a short consent administration and an approximately 35-minute survey.

6. *An estimate of the total public burden (in hours) associated with the collection:* The total estimated NIS-4 Jails public burden, inclusive of facility staff and respondent burden estimates, is 64,010 hours. This comprises 17,065 hours of facility staff burden and 46,945 hours of respondent interviewing burden. This burden estimate assumes 100% participation from both facilities and inmates, but historically both facility and inmate participation have not reached 100%. For purposes of comparison, during Year 3 of the NIS, the total maximum burden was estimated at 68,078 hours for the jail sample. The total burden used was 33,022 hours.
