

conclusion of the WVDP, the resulting calculated dose from the incidental waste is to be integrated with all the other calculated doses from material remaining material at the entire NRC-licensed site.

#### Previous Burials Authorized Under 10 CFR Part 20

The "Statement of Considerations" for the LTR, Section C.3, Other Exemptions (62 FR 39074) provided that in regard to past burials the Commission " \* \* \* would continue to require an analysis of site-specific overall impacts and costs in deciding whether or not exhumation of previous buried waste is necessary for specific sites. In addition, the general exemption provisions of 10 CFR part 20 are available to consider unique past burials on a case-by-case basis." The NDA contains significant amounts of buried radioactive material that was previously authorized under older provisions of part 20. This material will require appropriate evaluation as part of site license termination.

#### Environmental Analysis

An EIS is not needed at this step of the process of prescribing the LTR because the Commission is not establishing a new requirement for the site. This site is licensed to NYSERDA and, therefore, is already subject to the LTR by operation of the Commission's regulations. DOE in essence is acting as a surrogate for NYSERDA. The environmental impacts of applying the LTR to NRC licensees were evaluated in the Generic Environmental Impact Statement (GEIS), NUREG-1496, that supported the LTR. In promulgating the LTR, the Commission stated, in Section VI of the "Statement for Considerations" that it will conduct an environmental review to "determine if the generic analysis encompasses the range of environmental impacts at the particular site." The Commission further stated that it "will conduct an independent environmental review for each site-specific decommissioning decision where land use restrictions or institutional controls are relied upon by the licensee or where alternative criteria are proposed" as it recognized that the environmental impacts for these cases cannot be analyzed on a generic basis. The environmental impacts from the application of the criteria will need to be evaluated for the various alternative approaches being considered in the process before NRC decides whether to accept the preferred alternative for meeting the criteria permitted by the LTR. NRC intends to rely on the DOE/NYSERDA EIS for this purpose.

For NEPA purposes, DOE is considered the lead Federal agency. NRC, in view of its responsibilities under the WVDP Act, is considered a cooperating agency for this EIS and is participating in the development of the DOE/NYSERDA EIS. NRC does not anticipate the need to prepare its own duplicative EIS, since it can consider the environmental impacts described in the DOE/NYSERDA EIS in approving the particular decommissioning criteria for the WVDP under the LTR. Under this arrangement, if NRC is satisfied with the DOE/NYSERDA EIS, this EIS will fulfill the NEPA responsibilities for NRC under the WVDP Act. If NRC is not satisfied with the final DOE/NYSERDA EIS, then NRC will adopt as much of it as possible and modify or supplement it as necessary. In such a situation, NRC would publish its own draft EIS document for public review and comment before finalizing it. Once finalized, NRC's West Valley NEPA responsibilities would be fulfilled under the WVDP Act.

The WVDP Act does not address license termination for the site. License termination of the NRC license for the site, or portions thereof, is conducted (if license termination is possible) under the AEA. If NYSERDA pursues either full or partial license termination of the NRC license, at that time NRC will need to conduct an environmental review to determine if an EIS is necessary to support license termination.

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-250 and 50-251]

### Florida Power and Light Company Turkey Point Plant, Units 3 and 4 Notice of Availability of the Final Supplement 5 to the Generic Environmental Impact Statement Regarding License Renewal for the Turkey Point Plant, Units 3 and 4

Notice is hereby given that the U. S. Nuclear Regulatory Commission (NRC) has published a final plant-specific Supplement 5 to the Generic Environmental Impact Statement (GEIS), NUREG-1437, regarding the renewal of operating licenses DPR-31 and DPR-41 for the Turkey Point Plant, Units 3 and 4, for an additional 20 years of operation. The Turkey Point Plant units are operated by Florida Power and Light Company (FPL). Turkey Point Plant is located in Dade County, Florida. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative methods of power generation.

In Section 9.3 of the report:

The staff recommends that the Commission determine that the adverse environmental impacts of license renewal for Turkey Point Units 3 and 4 are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable. This recommendation is based on (1) the analysis and findings in the Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants, NUREG-1437; (2) the ER [Environmental Report] submitted by FPL; (3) consultation with other Federal, State, and local agencies; (4) the staff's own independent review; and

(5) the staff's consideration of public comments.

The final Supplement 5 to the GEIS is available electronically for public inspection in the NRC Public Document Room located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, or from the Publicly Available Records (PARS) component of NRC's document management system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/> (the Public Electronic Reading Room).
