

Where we do not have entered values for all U.S. sales, we calculated a per-unit assessment rate by aggregating the antidumping duties due for all U.S. sales to each importer (or customer) and dividing this amount by the total quantity sold to that importer (or customer). See 19 CFR 351.212(b)(1). To determine whether the duty assessment rates are *de minimis*, in accordance with the requirement set forth in 19 CFR 351.106(c)(2), we calculated importer (or customer)-specific *ad valorem* ratios based on the estimated entered value. Where an importer (or customer)-specific *ad valorem* rate is zero or *de minimis*, we will instruct CBP to liquidate appropriate entries without regard to antidumping duties. See 19 CFR 351.106(c)(2).

For the companies receiving a separate rate that were not selected for individual review, we will assign an assessment rate based on the cash deposit rate calculated for the Regal pursuant to section 735(c)(5)(B) of the Act. Where the weighted average *ad valorem* rate is zero or *de minimis*, we will instruct CBP to liquidate appropriate entries without regard to antidumping duties. See 19 CFR 351.106(c)(2).

For those companies for which this review has been preliminarily rescinded,¹⁴ the Department intends to assess antidumping duties at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(2), if the review is rescinded for these companies in the final results.

Cash Deposit Requirements

The following cash-deposit requirements will be effective upon publication of the final results for shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results, as provided by section 751(a)(2)(C) of the Act: (1) For the exporters listed above, the cash deposit rate will be that established in the final results of review (except, if the rate is zero or *de minimis*, no cash deposit will be required); (2) for

all other PRC exporters of subject merchandise which have not been found to be entitled to a separate rate, and thus, are a part of the PRC-wide entity, the cash-deposit rate will be the PRC-wide rate of 112.81 percent; and (3) for all non-PRC exporters of subject merchandise, the cash-deposit rate will be the rate applicable to the PRC supplier of that exporter. These deposit requirements shall remain in effect until further notice.

Notification of Interested Parties

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review, and this notice are in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.213 and 351.221(b)(4).

The applicant is seeking a five-year permit to assess the presence, abundance, and distribution of shortnose sturgeon within North Carolina rivers (Chowan, Roanoke, Tar-Pamlico, Neuse, and Cape Fear) and estuaries (Albemarle Sound) using non-lethal sampling methods combining hydroacoustic surveys (side-scan, DIDSON) with gill nets. Annually up to 10 shortnose sturgeon from the Chowan, Tar-Pamlico, Neuse, Cape Fear river systems and Albemarle Sound, and up to 20 shortnose sturgeon from the Roanoke River, would be captured,

¹⁴ These include Gallant Ocean (Lianjiang), Ltd.; Gallant Ocean (Nanhai), Ltd.; Shantou Yelin Frozen Seafood Co., Ltd. (d.b.a., Shantou Yelin Quick-Freeze Marine Products Co., Ltd.); Yangjiang City Yelin Hoitat Quick Frozen Seafood Co., Ltd.; Fuqing Yihua Aquatic Food Co., Ltd.; Fuqing Minhua Trading Co., Ltd.; and the companies of the Allied Pacific Group (comprised of Allied Pacific Food (Dalian) Co., Ltd.; Allied Pacific Aquatic Products (Zhanjiang) Co., Ltd.; Zhanjiang Allied Pacific Aquaculture Co., Ltd.; Allied Pacific (H.K.) Co., Ltd.; and King Royal Investments Ltd.).

measured, weighed, sampled for genetic tissue analysis, and PIT tagged. Additionally, up to five adults from each river and Albemarle Sound would be captured, anesthetized, and implanted with an internal sonic transmitter. Manual tracking and passive detections of telemetered fish at fixed receiver stations would provide information about movements and habitat use. Recaptures of tagged fish may also be used to produce abundance estimates if appropriate. Information gained about sturgeon presence, abundance and distribution would be used to guide future efforts to restore or protect key habitats.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

The applicant has requested a permit to test commercial gillnet gear that may have the potential to eliminate or reduce sea turtle bycatch. The research would involve testing modified large mesh (≤ 5 inches) commercial gillnets targeting southern flounder (*Paralichthys lethostigma*) in shallow waters of Core Sound, North Carolina. Test nets would be configured with illuminated, green Lindgen-Pitman Electralume lights that have shown promise for reducing sea turtle bycatch in another location. Two contracted commercial gillnet vessels would conduct a total of sixty fishing trips, setting five matched (control vs. experimental) sets of gillnets each day. Each matched set would consist of 100 yards of control net (gillnet without illuminated lights) and 100 yards of experimental net (gillnet with illuminated lights), for a total of 1,000 yards of net a day. With the exception of the lights, the gillnets would be identical in all other respects (e.g., twine material/size; hanging ration; stretch mesh). To follow fishing protocols, nets would be set at dusk and retrieved in the early morning. Turtles would be identified to species, measured, photographed, and flipper and PIT tagged. Captured sea turtles would be examined for any possible injuries before being released away from fishing area. Any comatose or debilitated turtles would be transported to a rehabilitation center. During the life of the permit, the applicant requests authorization to capture 18 Kemp's

ridley (*Lepidochelys kempii*), 15 loggerhead (*Caretta caretta*), 31 green (*Chelonia mydas*), 2 hawksbill (*Eretmochelys imbricata*), and 2 leatherback (*Dermochelys coriacea*) sea turtles. Of the captured turtles, 5 Kemp's ridleys, 5 loggerheads, 15 greens, 2 hawksbills, and 2 leatherbacks may be mortalities. The permit would expire in December 2011.
