SUPPLEMENTARY INFORMATION:

A. Background

Section 5(a) of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2054(a), authorizes the Commission to conduct studies and investigations relating to the causes and prevention of deaths, accidents, injuries, illnesses, other health impairments, and economic losses associated with consumer products. Section 5(b) of the CPSA, 15 U.S.C. 2054(b), further provides that the Commission may conduct research, studies and investigations on the safety of consumer products or test consumer products and develop product safety test methods and testing devices.

To help identify and evaluate product-related incidents, Commission staff invites and obtains direct feedback from consumers on issues related to product safety, such as recall effectiveness, product use, and perceptions regarding safety issues. By convening focus groups to provide information regarding use of a specific consumer product or class of consumer products, including recalled products, CPSC has collected valuable information. For example, Commission staff has used focus groups to assess consumers' behavior related to product recalls, pool and spa safety, the Consumer Product Safety Risk Management System, recreational off-road vehicle restraint systems, and cpsc.gov Web site redesign.

The information that the CPSC collects from future focus groups will

help inform the Commission's identification and evaluation of consumer products and product use, by providing insight and information into consumer perceptions and usage patterns. In some cases, one-on-one interviews may be conducted as a more in-depth extension of a focus group or in place of a traditional focus group. This information may also assist the Commission in its efforts to support voluntary standards activities and help CPSC identify consumer safety issues requiring additional research. In addition, based on the information obtained, CPSC may be able to provide safety information to the public that is easier to read and understood by a wider range of consumers.

B. Burden Hours

1. Respondents

The CPSC seeks the proposed extension of approval of a collection of information for consumer focus groups that may be conducted by the CPSC over the next three years. Staff estimates that over the 3-year period of this request, the Commission will conduct up to 20 focus groups, with 10 persons each, and 10 one-on-one interviews for a variety of projects. The total hours of burden to the respondents are (an estimated 4 hours per person for each focus group × 200 participants) + (an estimated 30 minutes per person for each individual interview × 10 participants) = 1,100 hours (367 hours per year for 3 years). The total annual cost is estimated at 1,100 × \$31.16 (U.S. Department of Labor, Employer Costs for Employee Compensation, September 2013) = \$34,276 (\$11,425.33 per year for 3 years).

2. Federal Government

The total cost of this collection to the federal government is estimated at approximately \$140,000. This represents nine months of staff time annually. This sum includes anticipated travel costs expended for meeting with contractors and contracts for conducting focus groups or one-on-one interviews as well as salaries and benefits (\$129,419). This estimate uses an annual total compensation of \$119,238 (the equivalent of a GS–14 Step 5 employee), with an additional 30.9 percent added for benefits (U.S. Bureau of Labor Statistics, “Employer Costs for Employee Compensation,” September 2013, Table 1, percentage of wages and salaries for all civilian management,

professional, and related employees), for a total annual compensation of \$172,559.

C. Requests for Comments

The Commission invites comments on the proposed collection of information, including:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic, or other technological collection techniques, or other forms of information technology.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.
