

2021. Since the project's implementation, the grantee has made satisfactory progress toward its approved work plan.

This supplemental funding is intended to enhance NCOA's existing work—enabling them to provide responsive support for community-based organizations during the COVID-19 pandemic by piloting the remote/virtual delivery of falls prevention interventions.

As a well-established and trusted organization in the aging and disability networks, NCOA is uniquely positioned to complete the work called for under this project. Their current grant has two primary goals: (1) To provide public education on the risk of falls and how to prevent them; and (2) support the implementation and dissemination of evidence-based falls prevention programs. To accomplish these goals, NCOA serves as the national leader in falls prevention, reaching millions of professionals, older adults, individuals with disabilities, and their families each year through Falls Prevention Awareness Day and other public awareness activities and events. They also provide technical assistance for organizations implementing falls prevention programs, including one-on-one consultation, national conferences, and webinars. They have a comprehensive, interactive website with tools and resources, including—but not limited to—issues briefs, tip sheets,

policy and practice models, and toolkits. They have also presented to the aging and disability networks locally and on a national level, and have developed substantive partnerships with program developers, organizations, universities.

Establishing an entirely new grant project at this time would be potentially disruptive to the work needed to ensure the continued availability of falls prevention programs. If this supplement were not provided, ACL grantees and the hundreds community-based organizations across the nation who provide many of these falls prevention interventions would be unable to do so due to the COVID-19 pandemic.
