BILLING CODE 9111–97–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R1–ES–2022–0029; ES1114010000–256–FF01E0000]

Record of Decision for the Final Environmental Impact Statement and Habitat Conservation Plan for the Elliott State Research Forest in Coos and Douglas Counties, Oregon

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; record of decision.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service) announce the availability of a record of decision (ROD) for the issuance of a permit under the Endangered Species Act (ESA) for certain activities at the Elliott State Research Forest supported by a habitat conservation plan (HCP) in Coos and Douglas Counties, Oregon. The ROD documents the Service's decision to issue an incidental take permit (ITP) to the Oregon Department of State Lands (DSL) in response to their permit

application. As summarized in the ROD, the Service has selected the proposed action alternative, which is issuance of an 80-year ITP authorizing take of species listed under the ESA that may occur incidental to research and management activities over the permit term implemented consistent with the HCP.

ADDRESSES: You may obtain copies of the ROD and other documents associated with the decision by any of the following methods:

- **Internet:** <https://www.regulations.gov> (search for Docket No. FWS–R1–ES–2022–0029) or at <https://www.fws.gov/project/elliott-state-research-forest-habitat-conservation-plan>.

- **Phone:** You may call Shauna Everett at 503–231–6949, to request alternative formats of the documents.

FOR FURTHER INFORMATION CONTACT: Shauna Everett, U.S. Fish and Wildlife Office, Oregon Fish and Wildlife Office (see **ADDRESSES**), by telephone at 503–231–6949, or by email at shauna_everett@fws.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the Service, announce the availability of a ROD for the issuance of a permit under section 10(a)(1)(B) of the ESA, as amended (16 U.S.C. 1531 *et seq.*) to the DSL for research and forest management activities on the Elliott State Research Forest, as supported and implemented under DSL's HCP. In compliance with the National Environmental Policy Act of 1969, as amended (NEPA; 42 U.S.C. 4321 *et seq.*), the Service prepared an environmental impact statement (EIS) analyzing effects to the human environment associated with the proposed action and alternatives. The ROD documents the Service's decision to select Alternative 2, the proposed action, which includes issuance of an 80-year ITP authorizing take of the threatened northern spotted owl (*Strix occidentalis caurina*) and threatened marbled murrelet (*Brachyramphus marmoratus*) that may occur incidental to research and management activities in the permit area over the permit term.

The Service and National Marine Fisheries Service (NMFS) make independent decisions regarding authorization for incidental take of the

species under their respective jurisdictions. NMFS's decision regarding authorization of take of the threatened Oregon Coast coho salmon (*Oncorhynchus kisutch*) is not addressed in the Service's ROD.

Background

As described in the HCP, DSL requested authorization for take of the northern spotted owl, marbled murrelet, and Oregon Coast coho salmon (together, the covered species) that may occur incidental to a variety of research and management activities, including forest research treatments, timber removal, forest and species research projects, supporting management activities, supporting infrastructure management, and activities identified in the conservation strategy and monitoring program of the HCP. These activities and the effects on covered species and the human environment are described further in the HCP and final EIS. Measures to minimize and mitigate impacts on covered species are described in the HCP for each species as conservation measures and conditions on covered activities, guided by goals and objectives in the conservation strategy of the HCP. DSL will monitor implementation of these measures for compliance and effectiveness.

The Service published a notice of intent in the **Federal Register** to develop an EIS for this project on May 5, 2022 (87 FR 26778). The Service published a notice of availability (NOA) for the draft EIS on November 18, 2022 (87 FR 69291), followed by an extension of the comment period (December 20, 2022, 87 FR 77877). Next, the Service published an NOA for the final EIS on January 10, 2025 (90 FR 10610). The EIS analyzed the environmental consequences of the proposed action (also described as the preferred alternative), a no action alternative, and two alternatives to the proposed action. All alternatives analyzed in detail include forest management activities (*i.e.*, timber harvest and reforestation, thinning, and supporting management activities and infrastructure); however, the implementation of these activities would vary by alternative, as described in the final EIS.

The Service prepared the draft EIS and final EIS pursuant to the Council on Environmental Quality's (CEQ's) implementing NEPA regulations at 40 CFR 1500–1508, effective as of May 20, 2022 (87 FR 23453; April 20, 2022). On February 25, 2025, in response to President Trump's Executive Order (E.O.) 14154, CEQ issued an interim final rule removing all its NEPA regulations (90 FR 10610, effective April

11, 2025). The Service prepared this ROD considering this change and related E.O.s, including E.O. 14154, “Unleashing American Energy,” as discussed in the ROD.

Rationale for Decision

We have made the determination that DSL’s application, including the HCP, meet the statutory permit issuance criteria set forth in section 10(a)(2)(B) (16 U.S.C. 1539(a)(2)(B)). Our assessment of the application was conducted in accordance with the requirements of section 10(a)(1)(B) of the ESA and its implementing regulations. Based on our review of the alternatives and their environmental consequences as described in the final EIS, we selected the proposed action because issuance of the ITP and implementation of the HCP best fulfill the Service’s statutory mission and responsibilities while meeting our purpose and need. This decision is described further in the ROD.

Authority

We provide this notice pursuant to NEPA (42 U.S.C. 4321 *et seq.*) and Department of the Interior guidance (318 DM 3).

Bridget Fahey,

Acting Regional Director, Pacific Region.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

[Docket ID BSEE–2024–0006; EEEE500000 256E1700D2 ET1SF0000.EAQ000; OMB Control Number 1014–0003]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Oil and Gas Production Safety Systems

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Bureau of Safety and Environmental Enforcement (BSEE, we) proposes to renew an information collection.

DATES: Interested persons are invited to submit comments. To be considered, your comments must be received on or before June 30, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Please provide a copy of your comments to Kelly Odom, Acting BSEE ICCO, 45600 Woodland Road, Sterling, VA 20166; or by email to kelly.odom@bsee.gov. Please reference OMB Control Number 1014–0003 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT:

Kelly Odom by email at kelly.odom@bsee.gov, or by telephone at (703) 787–17775. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the PRA and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on August 30, 2024, (89 FR 70664). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The regulations at 30 CFR part 250, subpart H concern oil and gas production safety systems and are the subject of this collection. The authority and responsibility for issuing these regulations are among those delegated to BSEE. This request also covers any related notices to lessees and operators (NTLs) that BSEE issues to clarify, supplement, or provide additional guidance on some aspects of our regulations.

BSEE uses the information collected under subpart H to:

- review safety system designs prior to installation to ensure that minimum safety standards will be met;
- evaluate equipment and/or procedures used during production operations;
- review records of erosion control to ensure that erosion control programs are effective;
- review plans to ensure safety of operations when more than one activity is being conducted simultaneously on a production facility;
- review records of safety devices to ensure proper maintenance during the useful life of that equipment; and
- verify proper performance of safety and pollution prevention equipment.

Title of Collection: 30 CFR part 250, subpart H, “Oil and Gas Production Safety Systems.”

OMB Control Number: 1014–0003.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Potential respondents include Federal Outer Continental Shelf (OCS) oil, gas,
