

coverage of the rule, or any part thereof, for small entities.²²

18. In the Third Further Notice, we seek to develop a record sufficient to adequately address issues related to developing long-term policies for ensuring that competitive carriers have access to unbundled network elements as changes are made to traditional telephone networks. In addressing these issues, we seek to ensure that competing providers, including small entity carriers, obtain access to inputs necessary to the provision voice and advanced telecommunications services. We believe that the issues on which we invite comment could impose minimal burdens on small entities, including both telecommunications carriers that request unbundled network elements and the incumbent LECs that, under section 251 of the Communications Act, must provide unbundled network elements to requesting carriers. As indicated above, both groups of carriers include entities that, for purposes of this IRFA, are classified as small entities. In framing the issues in this Third Further Notice, we have sought to develop a record on the potential impact our proposed rules could have upon small entities. We thus ask that commenters propose measures to avoid significant economic impact on small business entities.
