

ACTION: Notice of initiation of Five-Year ("Sunset") Reviews.

SUMMARY: In accordance with section 751(c) of the Tariff Act of 1930, as amended ("the Act"), the Department of Commerce ("the Department") is automatically initiating five-year ("sunset") reviews of the antidumping duty orders listed below. The International Trade Commission ("the Commission") is publishing concurrently with this notice its notice of *Institution of Five-Year Review*, which covers these same orders.

FOR FURTHER INFORMATION CONTACT: Martha V. Douthit, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, at (202) 482-5050, or Mary Messer, Office of Investigations, U.S. International Trade Commission, at (202) 205-3193.

SUPPLEMENTARY INFORMATION:

Background

The Department's procedures for the conduct of sunset reviews are set forth in 19 CFR 351.218. Guidance on methodological or analytical issues

relevant to the Department's conduct of sunset reviews is set forth in the Department's Policy Bulletin 98.3—*Policies Regarding the Conduct of Five-Year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders; Policy Bulletin*, 63 FR 18871 (April 16, 1998) ("*Sunset Policy Bulletin*").

Initiation of Review

In accordance with 19 CFR 351.218(c), we are initiating sunset reviews of the following antidumping duty orders:

DOC case No.	ITC case No.	Country	Product
A-475-059	AA-1921-167	Italy	Pressure Sensitive Plastic Tape.
A-588-068	AA-1921-188	Japan	Prestressed Concrete Steel Wire Strand.

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the Department's regulations regarding sunset reviews (19 CFR 351.218) and *Sunset Policy Bulletin*, the Department's schedule of sunset reviews, case history information (*i.e.*, previous margins, duty absorption determinations, scope language, import volumes), and service lists, available to the public on the Department's sunset Internet Web site at the following address: <http://ia.ita.doc.gov/sunset/>.

All submissions in these sunset reviews must be filed in accordance with the Department's regulations regarding format, translation, service, and certification of documents. These rules can be found at 19 CFR 351.303. Also, we suggest that parties check the Department's sunset Web site for any updates to the service list before filing any submissions. The Department will make additions to and/or deletions from the service list provided on the sunset Web site based on notifications from parties and participation in this review. Specifically, the Department will delete from the service list all parties that do not submit a substantive response to the notice of initiation.

Because deadlines in a sunset review are, in many instances, very short, we urge interested parties to apply for access to proprietary information under administrative protective order ("APO") immediately following publication in the **Federal Register** of the notice of initiation of the sunset review. The Department's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304-306.

Information Required From Interested Parties

Domestic interested parties (defined in 19 CFR 351.102(6)) wishing to participate in these sunset reviews must respond not later than 15 days after the date of publication in the **Federal Register** of the notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with the Department's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, the Department will automatically revoke the order without further review. See 19 CFR 351.218(d)(1)(iii).

If we receive an order-specific notice of intent to participate from a domestic interested party, the Department's regulations provide that all parties wishing to participate in the sunset review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of the notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic interested parties. Also, note that the Department's information requirements are distinct from the International Trade Commission's information requirements. Please consult the Department's regulations for information regarding the Department's conduct of sunset reviews.¹ Please

¹ A number of parties commented that these interim-final regulations provided insufficient time for rebuttals to substantive responses to a notice of initiation, 19 CFR 351.218(d)(4). As provided in 19 CFR 351.302(b), the Department will consider

consult the Department's regulations at 19 CFR Part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at the Department.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: December 19, 2003.

James J. Jochum,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 122303F]

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings of the North Pacific Fishery Management Council Fur Sea Committee.

SUMMARY: The North Pacific Fishery Management Council (Council) Steller Sea Lion Mitigation Committee will hold a public meeting.

DATES: The meeting will be held on January 20, 2004, 8:30 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at the Alaska Fishery Science Center, 7600 Sand Point Way NE, Bldg 4, National

individual requests for extension of that five-day deadline based upon a showing of good cause.

Marine Mammal Laboratory Conference Room, Seattle, WA 98115.

Council address: North Pacific Fishery Management Council, 605 W. 4th Ave., Suite 306, Anchorage, AK 99501-2252.

FOR FURTHER INFORMATION CONTACT: Bill Wilson, Council staff; telephone: 907-271-2809.

SUPPLEMENTARY INFORMATION: Agenda—(1) Introductions, (2) receive report from NMFS on Proposal Package and Discuss Any Issues, (3) update on schedule for preparation of Environmental Assessment and completion of rulemaking, (4) adaptive management - experimental design update, (5) other business as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Gail Bendixen at 907-271-2809 at least 7 working days prior to the meeting date.

Dated: December 30, 2003.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-S

DEPARTMENT OF ENERGY

National Energy Technology Laboratory; Notice of Availability of a Funding Opportunity

AGENCY: National Energy Technology Laboratory (NETL), Department of Energy (DOE).

ACTION: Notice of availability of a funding opportunity.

SUMMARY: Notice is hereby given of the intent to issue a Funding Opportunity No. DE-PS26-04NT15460 entitled "Focused Research in Federal Lands Access and Produced Water Management in Oil and Gas Exploration and Production." The Department of

Energy (DOE) National Energy Technology Laboratory (NETL), on behalf of its National Petroleum Technology Office (NPTO), seeks applications for cost-shared research projects that address specific Federal lands access or produced water management issues faced by the oil and gas industry. Applications will either address (1) solutions to improve access to oil and gas resources on Federal lands or (2) produced water management issues in low cost treatment technologies, beneficial use of produced water, or best management practices for handling, treatment and/or disposal. The goal is to provide solutions to issues that are limiting domestic on-shore or off-shore production while providing the same or higher levels of environmental protection.

DATES: The Funding Opportunity will be available on the DOE/NETL's Internet address at <http://www.netl.doe.gov/business> and on the "Industry Interactive Procurement System" (IIPS) Web page located at <http://e-center.doe.gov> on or about January 15, 2004.

FOR FURTHER INFORMATION CONTACT: Martin Byrnes, U.S. Department of Energy, National Energy Technology Laboratory, P.O. Box 10940, MS 921-107, Pittsburgh, PA 15236-0940. E-mail address: Martin.Byrnes@netl.doe.gov, telephone number: 412-386-4486.

SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) National Energy Technology Laboratory (NETL), on behalf of its National Petroleum Technology Office (NPTO), is soliciting applications for cost-shared research projects that address access to Federal lands or produced water management issues faced by the oil and gas industry. The goal is to provide solutions to issues that are limiting domestic on-shore or off-shore production while providing the same or higher levels of environmental protection.

The mission of the Department of Energy's Fossil Energy Oil Program is derived from the National need for increased oil production for national security, requirements for Federal lands stewardship, and increased protection of the environment. The Oil and Gas Environmental Program supports those goals and the National Energy Policy goal of increasing domestic oil and gas production, by providing technologies and approaches that reduce the cost of effective environmental protection and by providing technologies and approaches that improve environmental protection.

The program will accept applications for cost-shared research projects that

address (1) solutions to improve access to Federal lands or (2) produced water management issues in low cost treatment technologies, beneficial use of produced water, or best management practices for handling, treatment and/or disposal. The goal of this Funding Opportunity is to provide solutions to issues that are limiting domestic on-shore or off-shore production while providing the same or higher levels of environmental protection. These access issues and produced water management issues are limiting domestic production by restricting additional development or by adding costs that cause operators to abandon existing wells while substantial recoverable reserves remain in the ground.

The issues listed above are multifaceted problems. In many cases, the overall solution may vary by region or may require several separate steps to resolve completely. Selected projects are expected to describe the overall problem and the region or regions affected as well as describing how the proposed project fits into the overall solution. Selected projects are also expected to describe as completely as possible the impact that the project will have on increasing or maintaining domestic production. The description of the production impact should discuss in detail the resource affected and the amount of domestic production that can be added or maintained as a result of the successful completion of the project.

DOE anticipates issuing financial assistance (Cooperative Agreement) awards. DOE reserves the right to support or not support, with or without discussions, any or all applications received in whole or in part, and to determine how many awards will be made. Multiple awards are anticipated. Approximately \$9 million of DOE funding is planned over a 3 year period for this Funding Opportunity. The program seeks to sponsor projects for a single budget/project period of 36 months or less. All applicants are required to cost share at a minimum of 20% of the project total for projects submitted under the two areas of interest. Details of the cost sharing requirements, and the specific funding levels will be identified in Funding Opportunity. Telephone requests, written requests, E-mail requests, or facsimile requests for a copy of the Funding Opportunity package will not be accepted and/or honored. Applications must be prepared and submitted in accordance with the instructions and forms contained in the Funding Opportunity Announcement. The actual Funding Opportunity
