SUPPLEMENTARY INFORMATION:

I. Abstract

The success of fisheries management programs depends significantly on regulatory compliance. The vessel identification requirement is essential to facilitate enforcement. The ability to link fishing or other activity to the vessel owner or operator is crucial to enforcement of regulations issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. A vessel's official number is required to be displayed on the port and starboard sides of the deckhouse or hull, and on a weather deck. It identifies each vessel and should be visible at distances at sea and in the air. Vessels that qualify for particular fisheries are readily identified, gear violations are more readily prosecuted, and this allows for more cost-effective enforcement. Cooperating fishermen also use the number to report suspicious activities that they observe. Regulation-compliant fishermen ultimately benefit as unauthorized and illegal fishing is deterred and more burdensome regulations are avoided.

II. Method of Collection

Fishing vessel owners physically mark vessel with identification numbers in three locations per vessel.
