SUPPLEMENTARY INFORMATION: In September 2003, the NRC published a three-volume NUREG report, NUREG-1757, "Consolidated NMSS Decommissioning Guidance." That report provides guidance on: planning and implementing license termination under the License Termination Rule, in 10 CFR part 20, subpart E; complying with the radiological criteria for license termination; and complying with the requirements for financial assurance and recordkeeping for decommissioning and timeliness in decommissioning materials facilities. The draft Supplement 1, "Consolidated NMSS Decommissioning Guidance: Updates to Implement the License Termination Rule Analysis" (NUREG-1757, Supplement 1), is the first of periodic updates to reflect current NRC decommissioning policy.

Draft Supplement 1 provides proposed additions and updates to guidance addressing the following issues, which were explored in an NRC staff analysis of the implementation of the License Termination Rule: restricted use and institutional controls; on-site disposal of radioactive materials; scenario justification based on reasonably foreseeable land use; intentional mixing of contaminated soil; and removal of material after license termination. It also provides new and revised guidance to address several other issues. NRC is seeking public comment in order to receive feedback from the widest range of interested parties and to ensure that all information relevant to developing the document is available to the NRC staff. The NRC will review public comments received on the draft document. Suggested changes will be incorporated, where appropriate, and a final document will be issued for use. When finalized, the guidance is intended for use by NRC staff, licensees, and the public.

Draft Supplement 1 is issued for comment only and is not intended for interim use.

Dated at Rockville, MD, this 23rd day of September, 2005.

For the Nuclear Regulatory Commission.

Andrew Persinko,

Acting Deputy Director, Decommissioning Directorate, Division of Waste Management and Environmental Protection, Office of Nuclear Material Safety and Safeguards.
