#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The U.S. Census Bureau plans to request approval of data collection Form G-24, Prelist Survey of Special Districts. This form will be used to verify the existence of special districts for the 2002 Census of Governments, to obtain current mailing addresses, and to identify new districts. The quinquennial Census of Governments enumerates five types of local governments: county governments, municipal governments, township governments, school district governments, and special district governments. Lists of county, municipal, and township governments are kept up-to-date through the Boundary and Annexation Survey conducted annually by the Geography Division of the Bureau of the Census. School district governments and other "local education agencies" are kept current through data sharing arrangements with state education agencies and the National Center for Education Statistics. However, there is no national source of information on special district governments. We, therefore, enlist the help of county clerks and other county officials to provide information on changes in special districts, including the creation of new districts, disincorporation of existing districts, and address changes. An updated list is necessary for subsequent phases of the Census of Governments to ensure complete coverage and to minimize the need for remailings caused by inaccurate addresses.

##### II. Method of Collection

Each of 3,039 counties, consolidated city-county governments, and independent cities designated for the survey will be sent a printed list of previously identified special districts within their county areas. Respondents will be requested to review and update the list to identify those districts that are no longer active, districts with address changes, and districts that are not included in the list. For new special districts, respondents will be requested to provide, in addition to the district name, mailing addresses and the names of counties included in the service area.

The feasibility of electronic data collection will be explored in two states (as yet undetermined) by providing along with the printed paper requests instructions for accessing and reporting

on spreadsheet files. Spreadsheet files will be prepared for each of the respondent counties to update and passwords provided to each respondent.

In addition, in keeping with Governments Division policy, we will accept printouts of respondents' own files and electronic responses prepared from respondents' own files.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Transactions of U.S. Affiliate, Except a U.S. Banking Affiliate, with Foreign Parent (Form BE-605) and Transactions of U.S. Banking Affiliate with Foreign Parent (Form BE-605 Bank), obtain quarterly cut-off sample data on transactions and positions between foreign-owned U.S. business enterprises and their "affiliated foreign group" (i.e., their foreign parents and foreign affiliates of their foreign parents). The data are needed for compiling the international transactions accounts, input-output accounts, and national income and product accounts of the United States. The data are also needed to measure the amount of foreign direct investment in the United States, monitor changes in such investment, assess its impact on the U.S. and foreign economies, and, based upon this assessment, make informed policy decisions regarding foreign direct investment in the United States.

BEA is proposing the following three changes to the forms and instructions:
