

calculation of burden hours. The previous ICR included technical and managerial labor hours only in its burden calculations. To be consistent with the estimation methodology used in other ICRs, we have revised the calculations to include clerical labor burden, and have assumed it to be equal to 10 percent of technical labor hours. These revisions resulted in an increase in the respondent labor burden and associated cost.

There is an increase in the total O&M costs for industry respondents. This increase is due to a mathematical error identified in the previous ICR and is not due to changes in the individual O&M costs or the number of corresponding respondents.
