

program's history of no defaults, Federal credit budgeting principles require that the availability of CDBG funds to repay the guaranteed loans cannot be assumed in the development of the credit subsidy cost estimate (see 80 FR 67629, November 3, 2015). Thus, the estimate must incorporate the risk that alternative sources are used to repay the guaranteed loan in lieu of CDBG funds, and that those sources may be insufficient. Based on the rate that CDBG funds are used annually for repayment of loan guarantees, HUD's calculation of the credit subsidy cost must acknowledge the possibility of future defaults if those CDBG funds were not available. The fee of 1.64 percent of the principal amount of the loan will offset the expected cost to the Federal Government due to default, financing costs, and other relevant factors. To arrive at this measure, HUD analyzed data on comparable municipal debt over an extended period. The estimated rate is based on the default and recovery rates for general purpose municipal debt and industrial development bonds. The cumulative default rates on industrial development bonds were higher than the default rates on general purpose municipal debt during the period from which the data were taken. These two subsectors of municipal debt were chosen because their purposes and loan terms most closely resemble those of Section 108 guaranteed loans.

In this regard, Section 108 guaranteed loans can be broken down into two categories: (1) loans that finance public infrastructure and activities to support subsidized housing (other than financing new construction) and (2) other development projects (e.g., retail, commercial, industrial). The 1.64 percent fee was derived by weighting the default and recovery data for general purpose municipal debt and the data for industrial development bonds according to the expected composition of the Section 108 portfolio by corresponding project type. Based on the dollar amount of Section 108 loan guarantee commitments awarded from FY 2018 through FY 2022, HUD expects that 58.4 percent of the Section 108 portfolio will be similar to general purpose municipal debt and 41.6 percent of the portfolio will be similar to industrial development bonds. In setting the fee at 1.64 percent of the principal amount of the guaranteed loan, HUD expects that the amount generated will fully offset the cost to the Federal Government associated with making guarantee commitments awarded in FY 2024. Note that the fee increased from 0.94 percent

in FY 2023 to 1.64 percent in FY 2024, an increase of 0.70 percentage points in the level of fee charged.

This document establishes a statutorily required fiscal requirement in the form of a fee based on rate and cost determinations that does not constitute a development decision that affects the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6), this document is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).
