##### Background

Section 9 of the Federal ESA prohibits  
the take of fish or wildlife species listed  
as endangered or threatened by either  
the FWS or NMFS (16 U.S.C. 1538). The  
ESA defines the term “take” as: “harass,  
harm, pursue, hunt, shoot, wound, kill,  
trap, capture, or collect, or to attempt to  
engage in any such conduct” (16 U.S.C.  
1532(19)). NMFS has defined “harm” as  
an act which actually kills or injures  
fish or wildlife, and such acts may  
include “significant habitat  
modification or degradation which  
actually kills or injures fish or wildlife  
by significantly impairing essential  
behavioral patterns, including breeding,  
spawning, rearing, migrating, feeding, or  
sheltering” (50 CFR 222.102). Pursuant  
to section 10(a)(1)(B) of the ESA (16  
U.S.C. 1539(a)(1)(B)), NMFS may issue  
ITPs authorizing the take of listed  
species if, among other things, such  
taking is incidental to, and not the  
purpose of, otherwise lawful activities.

To receive an ITP under the ESA, an  
applicant must prepare an HCP that  
specifies the following: (1) the impact  
which will likely result from the taking;  
(2) steps the applicant will take to  
minimize and mitigate the impacts; (3)  
funding available to implement the  
steps; (4) what alternative actions to the  
taking the applicant considered and the  
reasons why these alternatives were not  
used; and (5) any other measures NMFS  
may require as being necessary or  
appropriate for purposes of the HCP (16
