

- Unavoidable adverse impacts, and irreversible and irretrievable commitments of resources.

- Potential cumulative environmental effects of past, present, and future operations.

- Status of compliance with all applicable federal, state, and local statutes and regulations and with international agreements, and required federal and state environmental permits, consultations and notifications.

- Compliance with all applicable Executive Orders.

- Natural disasters: floods, hurricanes, tornadoes, and seismic events.

Focus of the Mercury Management EIS will be on minimizing releases of mercury. DNSC anticipates that the key areas of interest will be human health risks, economic impacts, and accumulation of mercury in the global environment. Potential human health risks from storage, processing, and disposal, and from transportation and facility accidents will be evaluated. Consideration will also be given to issues related to accumulation of mercury in the global environment, and will be evaluated at the appropriate level of detail.

Public Participation in the EIS Process: CEQ regulations (40 CFR 1501.7) require an early and open process for determining the scope of an EIS and for identifying the significant issues related to the proposed action. To ensure that the full range of issues related to this proposal are addressed, DNSC invites Federal agencies, state, local and tribal governments, the general public, and the international community to comment on the scope of the Mercury Management EIS, including identification of reasonable alternatives. Additional opportunities for public input will be provided at scoping meetings (see below) and when the draft EIS is issued.

Scoping: The public scoping period begins with the publication of this Notice of Intent in the **Federal Register** and will continue until 30 June 2001. DNSC will consider all comments received or postmarked by the end of the comment period in defining the scope of this EIS. Comments received after that date will be considered to the extent practicable.

DNSC plans to conduct public scoping meetings in which Federal, state, local and tribal government agencies, nongovernmental organizations, the general public, and the international community are invited to participate in the open exchange of information and to submit comments on the proposed scope of the EIS. These

meetings will be held in communities near the facilities where the mercury is currently stored and at regional locations. The dates, times, and exact locations of the scoping meetings will be announced in a separate **Federal Register** notice at least 15 days before a meeting, posted on the Mercury Management EIS web site, and published in local and regional newspapers.

Issues raised at the scoping meetings will be documented in the Scope of Statement for the Mercury Management EIS. The objectives of this report are to summarize the essence of the comments received in a clear and concise manner and accurately portray the planned scope of the EIS. The Scope of Statement will be distributed to reading rooms near the meeting locations, posted on the EIS web site, and mailed upon request.

Timing: DNSC plans to issue the draft EIS in approximately one year. DNSC and the U.S. Environmental Protection Agency will separately announce availability of the draft EIS in the **Federal Register**. DNSC will publicize the draft EIS in other media, and will provide federal, state, local and tribal government agencies, nongovernmental organizations, the general public, and the international community with an opportunity to participate in additional information forums and to submit comments.

Requests for Copies of Draft EIS: To receive a copy of the Draft Mercury Management EIS, please submit your request to the addresses provided in this Notice. Members of the public who request a copy of the draft EIS should specify whether they would like a copy of the entire draft EIS (which will consist of multiple bound volumes), the Summary (which will be a single volume), or the draft EIS and Summary on computer CD.

Cooperating Agencies: DOE is a cooperating agency for the preparation of this EIS because some of the excess mercury to be considered in the Mercury Management EIS is currently stored at DOE's Y-12 National Security Complex in Oak Ridge, Tennessee.

Issued in Fort Belvoir, VA, this 30th day of January, 2001.

Richard J. Connolly,
Administrator.

DEPARTMENT OF ENERGY

Office of Arms Control and Nonproliferation

Proposed Subsequent Arrangement

AGENCY: Department of Energy.

ACTION: Subsequent arrangement.

SUMMARY: This notice is being issued under the authority of section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160). The Department is providing notice of a proposed "subsequent arrangement" under the Agreement for Cooperation in the Peaceful Uses of Nuclear Energy between the United States and the European Atomic Energy Community (EURATOM) and the Agreement for Cooperation Between the Government of the United States of America and the Swiss Federal Council Concerning Peaceful Uses of Nuclear Energy.

This subsequent arrangement concerns the retransfer of 54 fresh MTR fuel elements containing 16,195 g uranium, 15,018 g of which is U-235, from the Paul Scherrer Institut in Switzerland to the Euratom Supply Agency. The fuel elements will be sent to CERCA, France for refabrication and then utilization in the HFR at the Center Commun ole Reclierche, Netherlands. The expected date of shipment is September 2001. The material originally was exported to Switzerland pursuant to Nuclear Regulatory Commission Export License number XSNM01840.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, we have determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Dated: January 29, 2001.

For the Department of Energy.

Trisha Dedik,

Director, International Policy and Analysis
for Arms Control and Nonproliferation, Office
of Defense Nuclear Nonproliferation.
