

were beginning to be implemented by first having sources submit permit applications. As the later program submissions were being approved, some agencies were in the early stages of issuing permits. As of the beginning of this ICR, all programs are approved and the majority of sources initially subject to the program have been issued permits. All sources with permits will be performing collection activities. Some of the initial permits are expiring and sources are applying for renewal permits, other sources are making changes and applying for permit revisions.

Title: ECOS Survey of State Performance Measures.

Abstract: The survey in question asks state environmental commissioners to report on their contribution to enforcement and compliance assistance for 2000-2003. They are asked to refer to their own records and account for the number of inspections, reviews, complaints etc. that have taken shape during this time. They are also asked to give the number and type of mechanisms and fines applied and collected. It also questions if and how the states feel they have been effective using these methods. There is a section of the survey asking the states to rate how important and useful they feel the statistics and reports required by the EPA are in conveying the current conditions within their borders. Importantly, the survey also aims to capture information about state activity in outcome measurement. In particular, it asks states about their experiences with compliance rate measurement and with calculating the environmental benefits of enforcement actions and compliance assistance. The survey is designed to capture compliance rates and activities directly from state records. This will provide a means in which the states' efforts to promote the EPA's philosophy on enforcement and compliance can be more readily monitored. The responses to this collection of information are voluntary. The information obtained by this survey is completely confidential unless a state wants their information to be publicized.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any

previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: States.

Estimated Number of Respondents: 49.

Frequency of Response: One time.

Estimated Total Annual Hour Burden: 98 hours.

Estimated Total Annual Cost: \$4,500, includes \$0 annualized capital or O&M costs and \$4,500 annual labor costs.

Dated: August 31, 2004.

Director, Collection Strategies Division.

Example Exposure Scenarios

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of a final document.

SUMMARY: This notice announces the availability of a final report titled, *Example Exposure Scenarios* (EPA/600/R-03/036, April 2004), which was prepared by the U.S. Environmental Protection Agency's (EPA) National Center for Environmental Assessment (NCEA) of the Office of Research and Development (ORD).

ADDRESSES: The document will be made available electronically through the NCEA Web site (<http://www.epa.gov/ncea>). A limited number of paper copies will be available from the EPA's National Service Center for Environmental Publications (NSCEP), P.O. Box 42419, Cincinnati, OH 45242; telephone: 1-800-490-9198 or 513-489-8190; facsimile: 513-489-8695. Please provide your name, your mailing address, the title and the EPA number of the requested publication.

FOR FURTHER INFORMATION CONTACT: The Technical Information Staff, National Center for Environmental Assessment/ Washington Office (8623D), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460. Telephone: 202-564-3261; fax: 202-565-0050; e-mail: nceadc.comment@epa.gov.

SUPPLEMENTARY INFORMATION: Exposure scenarios are a tool to help the assessor develop estimates of exposure, dose,

and risk. An exposure scenario generally includes facts, data, assumptions, inferences, and sometimes professional judgment about how the exposure takes place. The human physiological and behavioral data necessary to construct exposure scenarios can be obtained from the *Exposure Factors Handbook* (EPA/600/P-95/002Fa-Fc, 1997). The *Exposure Factors Handbook* provides data on drinking water consumption, soil ingestion, inhalation rates, dermal factors including skin area and soil adherence factors, consumption of fruits and vegetables, fish, meats, dairy products, homegrown foods, breast milk, activity patterns, body weight, consumer products, and life expectancy.

The purpose of the *Example Exposure Scenarios* is to outline scenarios for various exposure pathways and to demonstrate how data from the *Exposure Factors Handbook* may be applied for estimating exposures. The example scenarios have been selected to best demonstrate the use of the various key data sets in the *Exposure Factors Handbook* and represent commonly encountered exposure pathways. An exhaustive review of every possible exposure scenario for every possible receptor population would not be feasible and is not provided. Instead, readers may use the representative examples provided here to formulate scenarios that are appropriate to the assessment of interest, and apply the same or similar data sets and approaches as shown in the examples.
