Title: NESHAP for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2352.03, OMB Control Number 2060-0634.

ICR Status: This ICR is scheduled to expire on February 28, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart AAAAAA.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an

affected facility, or any period during which the monitoring system is inoperative. Reports are also required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 19 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are the owners or operators of asphalt processing and roofing manufacturing facilities.

Estimated Number of Respondents: 75.

Frequency of Response: Semiannually and annually.

Estimated Total Annual Hour Burden: 2,846.

Estimated Total Annual Cost: \$276,724, which includes \$275,599 in labor costs, no capital/startup costs, and \$1,125 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in labor costs for the respondents from the most recently approved ICR. This increase is not due to any program changes. The adjustment increase reflects a change in labor rates from the Bureau of Labor Statistics as this ICR uses updated labor rates for calculating all burden costs.

However, there is an overall decrease in labor hours, capital/startup costs, O&M costs, and Agency costs as currently identified in the OMB Inventory of Approved Burdens. The decrease in burden and cost estimates occurred because the standards have been in effect for more than three years and the requirements are different during initial compliance as compared to on-going compliance. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes purchasing monitoring equipment,

conducting performance tests and establishing recordkeeping systems. This ICR, by and large, reflects the on-going burden and costs for existing facilities. Activities for existing source include continuous monitoring of pollutants and the submission of semiannual reports.

John Moses,

Director, Collection Strategies Division.
