

much further offshore than where Kaktovik seal hunts typically occur which is inside the barrier islands (AES 2009). It is assumed that effects on subsistence seal harvests would be negligible given the distances between Shell's proposed site clearance and shallow hazards and ice gouge surveys and the subsistence seal hunting areas of Nuiqsut and Kaktovik.

Seals are an important subsistence resource in the Chukchi Sea community of Wainwright. Ringed seals make up the bulk of the seal harvest. Most ringed and bearded seals are harvested in the winter or in the spring (May–July) which is before Shell's ice gouge survey would commence, but some harvest continues into the open water period. Hunting that does occur during the open water season generally occurs within 10 miles of the coastline (AES 2009), while the majority of ice gouge survey activity will be much further offshore. Timing of activities will be coordinated via the nearest communication and call centers operating in the Chukchi Sea, presumably in Wainwright and Barrow. It is assumed that effects on subsistence seal harvests would be negligible given the timing and distances between Shell's proposed ice gouge survey and the subsistence seal hunting area of Wainwright.

All survey activities will be operated in accordance with the procedures of Shell's Marine Mammal Monitoring and Mitigation Plan (4MP) that accompanies this program. This potential impact is mitigated by application of the procedures established in the 4MP and to be detailed in the POC. Adaptive mitigation measures may be employed during times of active scouting, whaling, or other subsistence hunting activities that occur within the traditional subsistence hunting areas of the potentially affected communities.

Shell states that it will continue its adopted spatial and temporal operational strategy that, when combined with its community outreach and engagement program, will provide effective protection to the bowhead migration and subsistence hunt.

Based on the above analysis, measures described in Shell's Draft POC, the proposed mitigation and monitoring measures (described earlier in this document), and the project design itself, NMFS has determined preliminarily that there will not be an unmitigable adverse impact on subsistence uses from Shell's 2010 open water marine survey activities in the Beaufort and Chukchi Seas.

Endangered Species Act (ESA)

There are two marine mammal species listed as endangered under the ESA with confirmed or possible occurrence in the proposed project area: the bowhead whale and the humpback whale. NMFS' Permits, Conservation and Education Division has begun consultation with NMFS' Endangered Species Division under section 7 of the ESA on the issuance of an IHA to Shell under section 101(a)(5)(D) of the MMPA for this activity. Consultation will be concluded prior to a determination on the issuance of an IHA.

National Environmental Policy Act (NEPA)

NMFS is currently preparing an Environmental Assessment, pursuant to NEPA, to determine whether or not this proposed activity may have a significant effect on the human environment. This analysis will be completed prior to the issuance or denial of the IHA.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to authorize the take of marine mammals incidental to Shell's 2010 open water marine surveys in the Beaufort and Chukchi Seas, Alaska, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Dated: May 12, 2010.

BILLING CODE 3510-22-P

CONSUMER PRODUCT SAFETY COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request; Safety Standard for Multi-Purpose Lighters

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: The Consumer Product Safety Commission ("CPSC" or "Commission") is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 ("the PRA"), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and

to allow 60 days for public comment in response to the notice. This notice solicits comments on a proposed request for extension of approval of a collection of information from manufacturers and importers of multi-purpose lighters.

DATES: Submit written or electronic comments on the collection of information by July 19, 2010.

ADDRESSES: Submit written submissions in the following way:

Written comments should be captioned "Proposed Collection of Information—Multi-Purpose Lighters" and e-mailed to the Office of the Secretary at cpsc-os@cpsc.gov. Comments may also be sent by facsimile to (301) 504-0127, or by Mail/Hand delivery/Courier (for paper, disk, or CD-ROM submissions), preferably in five copies, to: Office of the Secretary, Consumer Product Safety Commission, Room 502, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504-7923.

FOR FURTHER INFORMATION CONTACT:

Linda Glatz, Division of Policy and Planning, Office of Information Technology, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814, 301-504-7671, lglatz@cpsc.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget ("OMB") for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the CPSC is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, the CPSC invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of CPSC's functions, including whether the information will have practical utility; (2) the accuracy of CPSC's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3)

ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Title: Safety Standard for Multi-Purpose Lighters—16 CFR part 1212 (OMB Control Number 3041–0130—Extension).

Description: Section 14(a)(1) of the CPSA (15 U.S.C. 2063(a)) requires manufacturers, importers, and private labelers of a consumer product subject to a consumer product safety standard under the Consumer Product Safety Act (“CPSA”) or similar rule, ban, standard, or regulation under any other act enforced by the Commission to issue a certificate stating that the product complies with all applicable rules, bans, standards or regulations.

Section 14(b) of the CPSA (15 U.S.C. 2063(b)) authorizes the Commission to issue regulations to prescribe a reasonable testing program to support certificates of compliance with a consumer product safety standard under the CPSA or similar rule, ban, standard, or regulation under any other act enforced by the Commission. Section 16(b) of the CPSA (15 U.S.C. 2065(b)) authorizes the Commission to issue rules to require that firms establish and maintain records to permit the Commission to determine compliance with rules issued under the authority of the CPSA.

The Commission has issued regulations prescribing requirements for a reasonable testing program to support certificates of compliance with the standard for multi-purpose lighters. These regulations require manufacturers and importers to submit a description of each model of lighter, results of prototype qualification tests for compliance with the standard, and other information before the introduction of each model of lighter into commerce. These regulations also require manufacturers, importers, and private labelers of multi-purpose lighters to establish and maintain records to demonstrate successful completion of all required tests to support the certificates of compliance that they issue. 16 CFR part 1212, subpart B.

The Commission uses the information compiled and maintained by manufacturers, importers, and private labelers of multi-purpose lighters to protect consumers from risks of accidental deaths and burn injuries associated with those lighters. More specifically, the Commission uses this information to determine whether

lighters comply with the standard by resisting operation by young children. The Commission also uses this information to obtain corrective actions if multi-purpose lighters fail to comply with the standard in a manner that creates a substantial risk of injury to the public.

OMB approved the collection of information in the certification regulations for multi-purpose lighters under control number 3041–0130. The Commission proposes to request an extension of approval for this collection of information requirements.

We estimate the burden of this collection of information as follows. The cost of the rule’s testing, reporting, recordkeeping, and other certification-related provisions is comprised of time spent by testing organizations on behalf of manufacturers and importers, and time spent by firms to prepare, maintain, and submit records to CPSC. There are currently an estimated 59 firms that import, distribute and/or sell multi-purpose lighters in the United States, which is a subset of the approximately 145 firms total that may import, distribute and/or sell these lighters in the future. With a few exceptions, most manufacturers and importers have more than one model, currently ranging from 1 to 130 models for each firm. Based on past experience, an estimate of two models per firm is a reasonable number to use for calculating burden. Each manufacturer would spend approximately 50 hours per model. Therefore, the total annual amount of time that will be required for complying with the testing, recordkeeping, and reporting requirements of the rule is approximately 5,900 hours (59 firms \times 2 models \times 50 hours = 5,900 total hours requested). The annualized cost to respondents for the hour burden for collection of information is \$335,887 based on a total of 5,900 hours at \$56.93/hour (based on total compensation of all management, professional, and related occupations in goods-producing industries in the United States, September 2009, Bureau of Labor Statistics).

The annual cost of the rule to the Federal government is comprised chiefly of the Commission’s resources for compliance and enforcement activities. An estimated 2 full-time-equivalent (“FTE”) staff years of effort are required to administer the rule annually. The Commission’s cost for these staff activities is approximately \$170,000 per FTE. Thus, the annual cost of enforcing the rule to the Federal government is estimated to be about \$340,000. This cost estimate includes

the agency’s enforcement and field staff costs.

Dated: May 12, 2010.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.
