

expectation that 6,088 of these households will complete a screening instrument to determine if any youth in the eligible age range reside in the housing unit.

The assumption is that 1,218 of the households who complete the screening for eligibility will include eligible youth and these households will complete a more detailed screening instrument that (1) rosters all members of household; (2) confirms date of birth for all potentially eligible youth; and (3) identifies the most appropriate parent, legal guardian, or other caregiver to complete the Parent/Caregiver Survey.

Among the predicted 1,218 households that include an eligible youth, 895 households will be selected to participate in the NLSY27 pretest. Of the 895 households that are selected, the estimated yield is 800 completed interviews by youth and 518 completed interviews by parents or caregivers. The content of the interview will be consistent with the content in the first round of the OMB-approved NLSY97 survey, with some language updates and some changes to the number of items related to each topic, including adding

and removing questions across the different topics. Verification calls will be conducted for 10% of Eligibility Screeners and Household Screeners completed in-person.

This Pretest will enable BLS to examine how the survey systems, protocols, and procedures perform with the target population, so that any needed adjustments can be made prior to Round 1. The Pretest will also include some experiments to test survey procedures, the results of which will enable BLS to maximize efficiency and minimize respondent burden in NLSY27 screening and Round 1 data collection.

In addition, results from the Pretest will provide critical information to the BLS to ensure the success of the NLSY27's first round of collection, and in turn, the success of the future of the NLSY27 over the many subsequent rounds that are anticipated.

### III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
