II. General Information

Congress appropriates funding for specifically named community water infrastructure projects known as Community Project Funding (CPF)/ Congressionally Directed Spending (CDS) items, known hereafter as Community Grants Program projects. These Community Grants Program projects are identified on an annual basis in Annual Appropriation Acts and the grant authority for the program is identified within the Annual Appropriations Acts themselves. The Annual Appropriations Acts direct funding towards these projects, which are designated for the planning, design, and construction of drinking water, wastewater, and stormwater infrastructure, and water quality protection projects. For a project to be eligible for Community Grants Program funding, the project must be identified in the Annual Appropriations Acts.

The proposed federal action under consideration in this PEA is approving or denying Community Grants Program applications by either awarding or not awarding the Community Grants Program funding. In the PEA, the EPA analyzed the potential adverse and beneficial environmental impacts of the issuance of grant funding for the planning, design, and construction of eligible drinking water, wastewater and stormwater infrastructure projects, and water quality protection projects. The PEA presents a broad and high-level review of information on a nationwide basis on existing conditions and

discusses potential impacts and mitigation measures that might typically occur during construction and operation of broad project types.

The environmental review process, which is documented by the PEA, indicates that no potential significant adverse environmental impacts are anticipated from the proposed action. Based on the environmental impact analysis in the PEA, the EPA has determined that no significant environmental impacts are anticipated from the issuance of funding under the Community Grants Program and the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, making the preparation of an Environmental Impact Statement (EIS) unnecessary. Therefore, the EPA is issuing a preliminary FONSI.

An electronic copy of the PEA and preliminary FONSI (EPA No. N2025023) are available for download from EPA's NEPA Compliance Database at <https://cdxapps.epa.gov/cdx-enepa-II/public/action/nepa/details?nepald=503414>.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, contact the Chemical Review Manager identified in table 1 of this document.

B. What is registration review?

Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment. For additional background on the registration review program, see: <https://www.epa.gov/pesticide-reevaluation>.

II. What is the Agency's authority for this action?

EPA is conducting its registration review of the chemicals listed in this document pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 *et seq.*, and 40 CFR part 155, subpart C. FIFRA section 3(g) provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA, a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human

dietary risk from residues that result from the use of a pesticide in or on food.

III. What action is the Agency taking?

Pursuant to 40 CFR 155.58(c), this document announces the availability of EPA's interim registration review decision for the pesticide listed in table

1 of this unit. The interim registration review decision is supported by rationales included in the docket established for each chemical undergoing registration review.

TABLE 1—REGISTRATION REVIEW INTERIM DECISION BEING ISSUED

Registration review case name and No.	Docket ID No.	Chemical review manager
Dicrotophos	EPA-HQ-OPP-2008-0440	Patricia Biggio, biggio.patricia@epa.gov .

Consistent with 40 CFR 155.58(a), EPA posted a proposed interim decision for dicrotophos and invited the public to submit any comments or new information (89 FR 52457, June 24, 2024 (FRL-11989-01-OCSPP)). EPA considered and responded to any comments or information received during the public comment period in the respective registration review interim decision.

Consistent with 40 CFR 155.57, in its final registration review decision, EPA will ultimately determine whether a pesticide continues to meet the registration standard in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)).

Authority: 7 U.S.C. 136 *et seq.*

Dated: April 14, 2025.
