

postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled, "Thermal Overload Protection for Electric Motors On Motor-Operated Valves," is temporarily identified by its task number, DG-1264, which should be mentioned in all related correspondence. DG-1264 is proposed Revision 2 of Regulatory Guide 1.106, dated March 1977.

This regulatory guide describes a method acceptable to NRC's staff for complying with the above criteria with regard to the application of thermal overload protection devices that are integral with the motor starter for electric motors on motor-operated valves. This method would ensure that the thermal overload protection devices will not needlessly prevent the motor from performing its safety-related function.

### SUPPLEMENTARY INFORMATION:

#### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to an existing guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses. Revision 1 of Regulatory Guide 3.67, "Standard Format and Content for Emergency Plans for Fuel Cycle and Materials Facilities" was issued for public comment in May 2010 with a temporary identification as Draft Regulatory Guide, DG-3039. The comment period ended on July 12, 2010 and the final guide was prepared considering the comments received.

This guide provides guidance acceptable to the NRC staff on the information to be included in emergency plans and establishes a format for presenting the information. Use of a standard format will help ensure uniformity and completeness in the preparation of emergency plans.

The NRC's regulations in 10 CFR part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material," part 40, "Domestic Licensing of Source Material," part 63, "Disposal

of High-Level Radioactive Wastes in a Geologic Repository at Yucca Mountain, Nevada;" Part 70, "Domestic Licensing of Special Nuclear Material;" part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater Than Class C Waste;" and part 76, "Certification of Gaseous Diffusion Plants," require some fuel cycle and materials licensees to prepare emergency plans. The information specified in this guide should be included in the licensee's emergency plan to comply with the requirements of 10 CFR 30.32(i)(3), 40.31(j)(3), 63.161, 70.22(i)(3), 72.32, and 76.91.

## II. Further Information

In May 2010, DG-3039 was published with a public comment period of 60 days from the issuance of the guide. The public comment period closed on July 12, 2010. The regulatory analysis may be found in ADAMS under Accession No. ML103370659.

In addition, regulatory guides are available for inspection at the NRC's Public Document Room (PDR), Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852-2738.
