II. Discussion

The Coast Guard's requirements for commercial diving are found in Title 46 of the Code of Federal Regulations (CFR), part 197, subpart B. Based on data obtained by the Coast Guard in 2014, the majority of commercial diving operators subject to these requirements were members of commercial diving organizations that have established commercial diving standards.¹ As members of these organizations, these operators have committed to complying with the standards established by their organizations.

These organizations have made improvements over the years, such as in the training and qualification requirements of commercial divers, medical examinations, and procedures associated with the different modes of diving, that have made commercial diving operations safer. The Association of Diving Contractors International (ADCI) and the International Marine Contractors Association (IMCA) contacted the Coast Guard and requested that we review their standards and issue a Commercial Diving Operations—Equivalent Levels of Safety Policy Letter. The Coast Guard has completed the review and is issuing CG–OES Policy Letter 02–20, *Commercial Diving Operations—Equivalent Levels of Safety*.

In summary, CG–OES Policy Letter 02–20 provides that the Coast Guard considers commercial diving operations being performed in accordance with ADCI International Consensus Standards for Commercial Diving and Underwater Operations, edition 6.3 (2016)² and IMCA International Code of Practice for Offshore Diving (IMCA D
